#### DIVISION D—MISCELLANEOUS PROVISIONS

#### TITLE I—CONVEYANCE OF HOMESTAKE MINE

##### SEC. 101. SHORT TITLE.

This title may be cited as the “Homestake Mine Conveyance Act of 2001”.

##### SEC. 102. FINDINGS.

Congress finds the following:

(1) The United States is among the leading nations in the world in conducting basic scientific research.

(2) That leadership position strengthens the economy and national defense of the United States and provides other important benefits.

(3) The Homestake Mine in Lead, South Dakota, owned by the Homestake Mining Company of California, is approximately 8,000 feet deep and is situated in a unique physical setting that is ideal for carrying out certain types of particle physics and other research.

(4) The Mine has been selected by the National Underground Science Laboratory Committee, an independent panel of distinguished scientists, as the preferred site for the construction of the National Underground Science Laboratory.

(5) Such a laboratory would be used to conduct scientific research that would be funded and recognized as significant by the United States.

(6) The establishment of the laboratory is in the national interest and would substantially improve the capability of the United States to conduct important scientific research.

(7) For economic reasons, Homestake intends to cease operations at the Mine in 2001.

(8) On cessation of operations of the Mine, Homestake intends to implement reclamation actions that would preclude the establishment of a laboratory at the Mine.

(9) Homestake has advised the State that, after cessation of operations at the Mine, instead of closing the entire Mine, Homestake is willing to donate the underground portion of the Mine and certain other real and personal property of substantial value at the Mine for use as the National Underground Science Laboratory.

(10) Use of the Mine as the site for the laboratory, instead of other locations under consideration, would result in a savings of millions of dollars for the Federal Government.

(11) If the Mine is selected as the site for the laboratory, it is essential that closure of the Mine not preclude the location of the laboratory at the Mine.

(12) Homestake is unwilling to donate, and the State is unwilling to accept, the property at the Mine for the laboratory if Homestake and the State would continue to have potential liability with respect to the transferred property.

(13) To secure the use of the Mine as the location for the laboratory and to realize the benefits of the proposed laboratory it is necessary for the United States to—

(A) assume a portion of any potential future liability of Homestake concerning the Mine; and

(B) address potential liability associated with the operation of the laboratory.

#### JOINT EXPLANATORY STATEMENT

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3338), making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The conference agreement on the Department of Defense Appropriations Act, 2002, incorporates some of the provisions of both the House and Senate versions of the bill. The language and allocations set forth in House Report 107-298 and Senate Report 107-109 should be complied with unless specifically addressed in the accompanying bill and statement of the managers to the contrary.

Senate Amendment: The Senate deleted the entire House bill after the enacting clause and inserted the Senate bill. The conference agreement includes a revised bill.

#### DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

The conferees agree that for the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119) and by the Budget Enforcement Act of 1990 (Public Law 101-508), the term program, project, and activity for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2002, the accompanying House and Senate Committee reports, the conference report and accompanying joint explanatory statement of the managers of the Committee of Conference, the related classified annexes and reports, and the P-1 and R-1 budget justification documents as subsequently modified by Congressional action. The following exception to the above definition shall apply:

For the Military Personnel and the Operation and Maintenance accounts, the term “program, project, and activity” is defined as the appropriations accounts contained in the Department of Defense Appropriations Act. At the time the President submits his budget for fiscal year 2003, the conferees direct the Department of Defense to transmit to the congressional defense committees budget justification documents to be known as the “M-1” and “O-1” which shall identify, at the budget activity, activity group, and subactivity group level, the amount requested by the President to be appropriated to the Department of Defense for operation and maintenance in any budget request, or amended budget request, for fiscal year 2003.

#### TITLE I—MILITARY PERSONNEL

The conferees agree to the following amounts for the Military Personnel accounts:

[In thousands of dollars]

	Budget	House	Senate	Conference
Active Personnel:				
Army .....	23,626,684	23,336,884	23,446,734	23,752,384

Marine Corps .....	7,365,040	7,343,640	7,335,370	7,345,340
Air Force .....	20,151,514	19,784,614	20,032,704	19,724,014
Reserve Personnel:				
Army .....	2,604,197	2,629,197	2,670,197	2,670,197
Navy .....	1,643,523	1,644,823	1,650,523	1,654,523
Marine Corps .....	463,300	466,800	466,300	471,200

National Guard Personnel:				
Army .....	4,014,135	4,004,225	4,052,695	4,041,695

Total, Military Personnel .....	82,307,281	81,617,291	81,965,391	82,056,651

**PERSONNEL UNDEREXECUTION SAVINGS**

The conferees recommend a total reduction of \$313,200,000, instead of \$324,200,000 as proposed by the House, to the Active Military Personnel accounts due to lower than budgeted fiscal year 2001 end strengths, and differences in the actual grade mix of officers and enlisted recommended in the budget request. The General Accounting Office estimates that the active components will have fewer personnel on board to begin fiscal year 2002, and as a result, the fiscal year 2002 pay and allowances requirements for personnel are incorrect and the budgets overstated.

**PERMANENT CHANGE OF STATION MOVES**

The conferees recommend a total reduction of \$180,000,000, instead of \$317,000,000 as proposed by the Senate to the active Military Personnel accounts for permanent

change of station (PCS) moves. The conferees direct the Secretary of Defense to develop a comprehensive plan to reduce the quantity of PCS moves by 25 percent by the end of fiscal year 2004, and to report to the congressional defense committees on that plan no later than May 1, 2002.

**FORCE STRUCTURE CHANGES**

The conferees recommend a total of \$88,500,000 in the Military Personnel and Operation and Maintenance accounts for force structure that was not included in the budget request, as follows:

[In thousands of dollars]				
	Milpers	O&M	Proc.	Total
Air Force B-52 aircraft .....	2,300	26,000	14,300	42,600
Army Reserve Full-Time Support .....	10,000			10,000

[In thousands of dollars]				
	Milpers	O&M	Proc.	Total
Army National Guard Full-Time Support .....	24,700	11,200		35,900

Active End Strength [Fiscal year 2002]

Navy .....	376,000	376,000	
Marine Corps .....	172,600	172,600	
Air Force .....	358,800	358,800	
Total, Active Personnel ...	1,387,400	1,387,400

## ARMY REORGANIZATION

The conferees commend the Secretary of the Army for undertaking a comprehensive review of Army requirements generation, acquisition, resource management, and Departmental headquarters functions and systems. The Center for Naval Analyses study required by the conferees in fiscal year 2001 identified serious management issues that merited careful review and analysis. The Army has taken several promising steps in response to this report to reduce duplication and improve efficiency in the acquisition and headquarters management area, and the conferees are hopeful that the final Army plan will realize the full benefits identified in the CNA analysis. The conferees have included a Provision (Sec. 8149) requiring the Secretary of the Army to submit a final report to the congressional defense committees describing the complete reorganization plan that he intends to implement by no later than April 15, 2002. This report shall describe the final realignments contemplated for all functional areas, and identify the operational efficiencies, personnel realignments and cost savings to be derived from this comprehensive reorganization on an annual basis through fiscal year 2008. The conferees be-

lieve the Army also will benefit from a close-out review by the CNA review team to comment on and validate the realignments. Section 8149 calls for a final CNA review to undertake this activity. The conferees view these management reforms as an important step to improve the Army's ability to deliver its bold transformation plan in the time-frame articulated by Army leaders.

## INNOVATIVE SAFETY MANAGEMENT PILOT

The conferees recognize that there are initiatives underway in the private sector that dramatically reduce the incidence of workplace injuries and their related costs. The conferees therefore direct the Secretary of the Army to adopt for use in the workplace of civilian employees of the Department of the Army such work safety models used by employers in the private sector that the Secretary considers as being representative of the best work safety practices in use by private sector employers. The conferees recommend an additional \$2,500,000 in Operation and Maintenance, Army to begin this initiative in fiscal year 2002.

## UNUTILIZED PLANT CAPACITY

The conference agreement provides an additional \$17,500,000 for industrial preparedness, or unutilized plant capacity, above the

funds identified in the budget request. The conferees direct the Army to allocate no less than \$25,000,000 above the request for unutilized plant capacity. Of these funds, \$7,500,000 shall be available for the Arsenal Support Initiative.

## ROTC FACILITY REHABILITATION

The conferees provide an additional \$200,000 in Operation and Maintenance, Army only for rehabilitation of the athletic facility used for the joint Husson College and University of Maine ROTC program.

## ST. LOUIS ARMY AMMUNITION PLANT

The conferees direct that of the funds provided in Operation and Maintenance, Army, \$5,000,000 shall be available only for St. Louis Army Ammunition Plant clean up and disposal costs.

## OTHER PROGRAMS

The conferees agree to provide funds for the Expert Radar Signature Solutions in the appropriate Research, Development, Test and Evaluation account.

The conferees agree that funds provided for language training programs should be used to meet critical advanced language training requirements.

## SHIP DEPOT MAINTENANCE

The conferees are aware that the ship depot maintenance account has been underfunded in recent years. This underfunding was caused by several factors, including a deficient calculation that understated the requirement, underfunding of the requirement which was identified, and the added costs associated with high deployment levels. The conferees applaud the Navy's efforts to revise the maintenance calculation to more adequately reflect the real requirement, and to fully fund maintenance in the future. The conferees recognize, however, that the FY02 budget lacks the necessary funds to implement them. The conferees expect that for

FY03 and future years the Navy will implement the revised maintenance calculations to properly align depot maintenance requirements and necessary funding. The conferees direct the Secretary of the Navy to provide with the FY03 budget submission a plan to eliminate the maintenance backlog that has accumulated as a result of previous underfunding.

## MANUAL REVERSE OSMOSIS DESALINATORS

The Committee has provided an additional \$1,000,000 for the refurbishment of Manual Reverse Osmosis Desalinators (MROD). Of the additional funds provided, \$500,000 is to be used for Navy surface fleet MROD refurbishment, and \$500,000 is to be used for Navy Aviation MROD refurbishment.

## POINT MOLATE

In view of the public safety and historic preservation issues involved, the conferees believe the Navy should continue the level of effort it provided in FY 2001 in carrying out its joint caretaker responsibilities for the base at Point Molate while it is being prepared for conveyance. The conferees expect the Naval Facilities Engineering Command and the City of Richmond, CA to operate under similar terms and conditions as agreed to in their Cooperative Agreement through the balance of fiscal year 2002.

## CONTAMINANT AIR PROCESSING SYSTEMS

The conferees commend the Secretary of the Air Force for standardizing mission critical equipment that allows Air Force personnel to be effectively processed after contact with biological, chemical or nuclear agents. The conferees instruct the Secretary to use \$1,000,000 within available funds to enable installations to purchase contaminant air processing systems and related components to ensure all Air Force installations are standardized in this methodology and equipment.

## INTERNATIONAL SUPPORT

The conferees are pleased with efforts and progress made in programs funded in the Air Force subactivity group for International Support. The conferees are aware that these funds support U.S. Central Command's military contacts with Central Asian States. The conferees encourage continued progress in the Cooperative Defense Initiative that is underway to assess the ability of regional partners to respond to chemical or biological attacks. Funding reductions in this line to limit overall growth are not punitive in nature, and the Secretary of the Air Force is encouraged to support this worthy program.

## OTHER PROGRAMS

The conferees agree to reduce U-2 operation and maintenance (O&M) funding by \$3,000,000 due to availability of funds in the appropriate Research, Development, Test and Evaluation account and recommends that these funds be transferred to O&M to offset this reduction.

The conferees agree to provide an additional \$1,500,000 for the Threat Representation and Validation project and an additional \$2,500,000 for operation of the Eagle Vision System for the Air National Guard.

## BIOFUELS AND BIOBASED PRODUCTS

With the heavy Department of Defense reliance on gasoline and diesel fuels derived from foreign oil production, the conferees agree that it is important for the Department to investigate new ways to increase the usage of alternative domestically produced fuels, including biofuels and biobased products. The conferees direct the Department to submit a report to the congressional defense committees by March 15, 2002 detailing its best estimates of: (1) the total annual volume and cost of fuels of fuels by fuel type (gasoline, diesel, ethanol, biodiesel, methanol, and other) used by the Department, and the country source of these fuels; (2) a description of the procedures in place to procure domestically produced alternative fuels; (3) a description of the procedures in place to encourage the procurement of flexible fuel vehicles, such as those equipped with E-85 (85% ethanol) engines; (4) an explanation of changes to programs, plans, or procedures under consideration by the Department to maximize the use of biofuels and biobased products in DoD operations; (5) a description of practices and procedures to track the actual DoD usage of biofuels; and (6) a description of possible incentives the DoD could employ to increase the acquisition of alternative or variable fuel vehicles and encourage the use of such fuels as specified by the National Environmental Policy Act. The conferees also direct the Department to work with the Office of Energy Policy and New Uses of the U.S. Department of Agriculture to support independent testing of biofuels and biobased products. The Department should also cooperate with industry suppliers to facilitate inclusion of such biofuels and biobased products on the De-

fense Logistics Agency list of items approved for DoD purchase.

## DEFENSE THREAT REDUCTION AGENCY

Funding for the Operation and Maintenance activities of the Defense Threat Reduction Agency were provided for in Title IX of the House bill and report. These funds are provided in Title II of the Conference Report.

## DLAMP

The conferees recommend a reduction to the Defense Leadership and Management Program for overhead costs and backfills.

NATIONAL FOREIGN LANGUAGE SKILLS  
REGISTRY

The Conferees direct the Secretary of Defense to establish an internet-based data registry of United States citizens who state that they are willing to be recruited in times of national emergency to assist the Department with translation and interpretation. The Secretary shall designate the foreign languages and levels of fluency deemed to be critical to the needs of the Department. The Director, Defense Manpower Data Center shall maintain the registry. In implementing this registry, the Director may collaborate with the National Foreign language Center and the Defense Language Institute.

STUDY ON INTELLIGENCE CAPABILITIES AND  
DATA RESOURCES INTEGRATION

To enhance intelligence gathering capabilities and data resource integration following the events of September 11, 2001, the conferees recommend an increase of \$5,000,000 for preparing a management action plan to assess how measurement and signature intelligence can be integrated with other intelligence activities and data. The goal of this plan should be to improve support for warfighter operations and policy decision-

making. A primary focus of this study should be to complete the concept development and associated operations and design requirements for a measurement and signature intelligence data archive to provide back-up capability and enabling cross-disciplinary integration of distributed data. The study should consider all shortfalls in MASINT capabilities and their integration. The conferees direct the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence to provide to the congressional defense committees an interim report containing an outline of the content and expected milestones this study no later than 45 days after enactment of this Act and a final report no later than June 1, 2002.

## BASE COMMUNICATIONS SUSTAINMENT

The conferees recommend a reduction in base communications sustainment and reiterate the Senate position that more focus must be placed on funding deployable and mobile communications requirements, rather than placing such items on unfunded lists. The conferees provide an additional \$3,000,000 for AN/PRC-148 Multi-band Intra/Inter Team Radios in Procurement, Defense Wide which is the number one unfunded requirement for Special Operations units in the field.

## ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES

The conferees direct that of the funds provided in "Operation and Maintenance, Defense-Wide" for the Impact Aid program, \$1,000,000 be available only for the purpose of making payments to local educational agencies to assist them in adjusting to reductions in the number of military dependent students as a result of the closure or realignment of military installations.

## CH-47 MODIFICATIONS

The conference agreement provides \$253,460,000 for CH47 Chinook helicopter modifications, a reduction of \$24,000,000 from the budget request. The conferees have reduced funding in light of the restructuring of this program. Within the amount provided, the conferees direct the Army to consider fully funding the lean cabin and IPF initiatives.

## CH-47 Chinook Seat Upgrade

The conferees agree to provide \$2,000,000 to procure commercially designed rotating and traversing crashworthy seats for use of the crew chief and mission specialist, to provide better crash protection without impeding the mobility of the key aircrew members.

**TACTICAL UNMANNED AERIAL VEHICLE**

The House recommended \$63,000,000 for the TUAV, a reduction of \$21,000,000 from the budget request. The House included language directing that funds provided for the low-rate initial production (LRIP) III of the TUAV may not be obligated or expended until the TUAV successfully completes the

planned AEC assessment the Fall/Winter of 2001 and the Secretary of the Army certifies that the TUAV has been adequately tested and justifies the initiation of the LRIP III prior to the completion of initial operational test and evaluation. The Senate recommended \$48,500,000 for the TUAV, a reduction of \$35,800,000 from the budget request. The Senate included language stating that

the system's viability should be validated prior to procurement of additional units. The conferees recommended \$57,300,000 for the TUAV, a reduction of \$27,000,000 from the budget request. The conferees agree that the language contained in both the House and Senate reports conveys the same concerns and should be implemented by the Army.

## Joint Primary Aircraft Training System (JPATS)

The conference agreement provides an additional \$30,800,000 to purchase a minimum of seven aircraft. Should production costs result in a lower than assumed unit cost, the Navy is encouraged to use whatever funds remain to purchase additional JPATS aircraft. Also, the conferees expect the Navy to fund, at economic rates, additional purchases of JPATS trainer aircraft in future budget requests.

## Tactical Trident – SSGN

The conferees have agreed to provide a total of \$440,440,000 in procurement and research funding for the Tactical Trident program, an increase of \$324,000,000 to the budget request. The additional funding is provided for the acquisition of a nuclear reactor core, and all necessary, design, planning, and long-lead component costs to initiate a four boat SSGN program. The conferees strongly endorse this program and direct the Department of the Navy to budget accordingly in its out-year budget plan to support a total of four Tactical Trident conversions.

**SBIRS HIGH RADIATION HARDENED PARTS**

The conferees are very troubled by recent developments in the SBIRS High program. DoD and Air Force officials have provided new indications that the previously reported \$2,000,000,000 shortfall and 2 year slip may, in fact, understate the severity of the problems. Not only is DoD considering a variety of

major program restructures, but it is also considering whole new satellite approaches.

The conferees are also aware of the issue of diminished manufacturing sources for selected radiation hardened parts in the current SBIRS High design. The Air Force has requested that funds be retained in advance procurement for a “lifetime buy” of these parts. The conferees are sympathetic to the

issues involved with this request but given the unclear status of the program, it is premature to make a definitive judgment with respect to funding these parts. The conferees encourage DoD, once it has determined how best to proceed with the program, to submit a reprogramming request to fund these parts as needed at that time.

## TELEPORTS

The conferees provide \$97,351,000 for teleports, however, only 429,200,000 of the funds provided are available for obligation until (the service chiefs unanimously agree on a procurement plan. DISA shall not obligate any amount of funds over \$29,200,000 until the agreed upon plan is provided to the Congress.

## PATRIOT ADVANCED CAPABILITY—3

The Conferees agree to provide \$736,574,000 for the PATRIOT Advanced Capability—3 (PAC—3), an increase of \$60,000,000 to the program. The increase includes \$15,000,000 for the efficient purchase of hard to acquire parts, eliminating the need for a near term redesign of the missile. It also includes \$45,000,000 available either to purchase addi-

tional missiles in fiscal year 2002 or for additional equipment for the production facility. The Conferees encourage the Department to increase production of this missile in an efficient but prudent manner and direct the Department to ensure that enough funds are in the Future Years Defense Plan to begin purchasing at least 20 missiles a month as soon as possible.

ARMY VENTURE CAPITAL SCIENCE AND  
TECHNOLOGY DEMONSTRATION

The conferees agree with the concept, as proposed in the House passed Department of Defense Appropriations bill for fiscal year 2002, of establishing a Venture Capital fund demonstration to enhance Army access to advances in science and technology. Accordingly, the conferees have included a general provision, Sec., 8150 that provides \$25,000,000 for the formation of such a corporation pursuant to authority of 10 U.S.C. 2371.

## HYBRID ELECTRIC DRIVE RESEARCH

The conferees agree to fully fund the Army's request for Combat Hybrid Power Systems (PE 603005/441), an amount of \$18,000,000. These funds should be used to accelerate the development of critical hybrid electric technology components and integration into FCS ground vehicles. These funds also should be applied to development of hybrid electric architectures for combat vehicles. The conferees direct the Secretary of the Army to provide to the congressional defense committees a report detailing the Army's plan for implementing this direction with the submission of the fiscal year 2003 Department of Defense budget request.

Though the conferees are encouraged by recent developments in the area of hybrid electric drive, there is concern that the Army has not performed adequate testing and evaluation of hybrid electric technology in extreme temperature environments. In particular, the conferees are concerned that the sources necessary to ensure stable, consistent and adequate power to the overall system have not been developed and tested in extreme cold-weather environments. Therefore, the conferees recommend that the Army conduct testing of hybrid electric technology, including the power sources associated with the technology, in extreme cold weather environments to ensure adequate power and performance to this critical technology.

## STARSTREAK-STINGER OPERATIONAL TEST

The conferees agree to provide an additional \$13,600,000 for the Starstreak-Stinger operational test program. Of this amount, \$12,000,000 should be used to conduct the live-fire, side-by-side operational test of the Starstreak and Stinger missile for the Apache helicopter. The remainder should be made available to conduct test firing from the Apache against ground targets.

ARMY HIGH PERFORMANCE COMPUTING  
RESEARCH CENTER (AHPCRC)

The conferees have added \$10,500,000 for the activities of the Army High Performance Computing Research Center. Of these funds, \$2,000,000 is only for basic research at the Center's academic partner institutions; and \$8,500,000 is only for (1) the use, operation and maintenance of the Center's high performance computing systems and networks; (2) staff scientist services to support Army research activities; (3) technology exchange programs with Army laboratories, outreach and education programs; and (4) management activities of the research program and center, including publications, seminars and workshops.

## DOMED HOUSING UNITS

From within funds made available in Research, Development, Test and Evaluation, Army, the conferees direct that the Commanding General of the Army Space and Missile Defense Command acquire and maintain domed housing units for military personnel on Kwajalein Atoll and other island locations in support of the mission of the command.

## CCS-MK2

The conferees agree that it is vital that the future development and evolution of combat control capabilities for the nation's submarine force takes place in a fully competitive acquisition environment and that the technical architecture of submarine combat control systems utilizes open systems compute processing standards. The conferees therefore, direct the Department of the Navy to submit an acquisition plan for the CCS-MK2 program to Congress no later than April 15th, 2002 which addresses these concerns to include potential options to compete the role of prime system integrator. The conferees do not agree to House language restricting the use of funds for the CCS-MK2 program.

## JOINT EXPERIMENTATION

The conferees agree to provide \$103,802,000 for Joint Experimentation, a decrease of

\$15,000,000 to the budget request. The conferees also direct the Secretary of Defense to provide a report to the Appropriations Committees no later than May 15, 2002 which examines whether the Office of the Director, Force Transformation should assume responsibility for the oversight and funding of the direction, preparation, execution and assessment of the U.S. Joint Forces Command Joint Experimentation program.

## TACTICAL INPUT SEGMENT (TIS) AND NAVY INPUT STATION (NAVIS)

In an effort to assist the Navy in ensuring an on-time delivery of a next generation real-time reconnaissance imagery receiving and display system, the conferees recommend that within amounts appropriated to the Office of Naval Research, up to \$2,000,000 may be made available to build additional Navy Input Stations (NAVIS) ground stations that meet emergent oper-

ational requirements and provide risk mitigation for the Tactical Input Segment (TIS).

In addition, the conferees direct the Navy to continue to integrate the technologies developed in NAVIS into the TIS architecture to ensure the best capabilities of both systems are delivered to the Fleet in time for the first F/A-18 SHARP deployment. The conferees believe that combining such technologies will best serve the tactical precision strike requirements for the Navy now and in the future.

## SPRAY COOLING TECHNOLOGY

The Conferees are concerned to learn that despite appropriations in two prior years, arrangements for the manufacture of spray cooling technology have yet to be finalized. The conferees direct the Marine Corps to act in an expedited manner to resolve this issue.

## BALLISTIC MISSILE DEFENSE

The conferees agree to provide a total of \$7,766,999,000 for ballistic missile defense research and development and related procurement activities. Coupled with increases for new and expanded counter-terrorism programs, the conference agreement provides a combined total of \$8,244,999,000 for ballistic missile defense and increased counter-terrorism activities.

The Department of Defense is about to initiate a radical restructuring of the ballistic missile defense program management organization. The conferees support the efforts of the Department to devise a management structure that facilitates integration of the various ballistic missile defense research and development efforts. The Department, however, is cautioned against implementing a management structure and related decision-making process that limit adequate oversight of the program by the Pentagon's operational testing, financial, and programmatic review groups. Also, the conferees will continue to monitor this program's management activities to ensure Congressional oversight.

Within each program element, the conferees have identified several special interest projects for purposes of reprogramming and budget justification material. (The conferees agree with the House language regarding reprogramming rules and budget justification material for ballistic missile defense programs.) The special interest projects are as follows:

Terminal Phase Systems: MEADS and ARROW;

Midcourse Phase Systems: Ground-based Midcourse, Pacific Test Bed, and Sea-based Midcourse (Navy Theater Wide);

Boost Phase Systems: Sea-based Boost, Air-base Boost (Airborne Laser) and Space-based Boost (Space based Laser);

Sensors: Satellite Sensor Technology and RAMOS.

## THEATER HIGH ALTITUDE AREA DEFENSE

The conferees agree to provide \$872,481,000 for the Theater High Altitude Area Defense (THAAD) program, a reduction of \$50,000,000

to the request. This amount includes \$160,000,000 for the Block 2004 THAAD research and development program. The Block 2004 funds should be used to reduce risk in the THAAD research and development program and acquire a sufficient number of test assets to ensure a robust testing profile. Further, the conferees direct that none of the funds provided be used to accelerate THAAD pre-production or deployment unless the Secretary of Defense certifies to the Congressional defense committees that threats to our national security or military forces warrant otherwise.

## SATELLITE SENSOR TECHNOLOGY

The conferees agree with House funding recommendations regarding SBIRS Low and the Satellite Sensor Technology program. This agreement is based, in part, on discussions with the Undersecretary of Defense (AT&L) who indicated that the problems in the precursor SBIRS High program are so significant as to make the current schedule for SBIRS Low unexecutable. The conference agreement allows BMDO to step off the acquisition track to place greater emphasis on risk reduction and maturation of new technologies. These efforts, to be performed within the Satellite Sensor Technology program, should proceed at a measured pace. The conferees note that this agreement in no way precludes continued technology efforts on the current SBIRS Low program. The conferees agree that the Secretary may obligate the funding provided for the Satellite Sensor Technology program as he determines necessary for the SBIRS Low program. The conferees direct DoD to develop specific plans for the Satellite Sensor Technology program for fiscal year 2002 and out and provide this plan to the congressional defense committees no later than May 15, 2002. The conferees further direct that the congressional defense committees be notified of any funding realignments regarding this program.

## RADIATION HARDENED ELECTRONICS

The conferees support the House language regarding radiation hardened electronics, except that they direct that not less than \$14,500,000 in program element 602715BR and

\$38,000,000 provided in "Domestic Radiation Hardened Electronics" in the Defense Production Act be used for the purpose described in the House report.

## MINIATURIZED WIRELESS SYSTEM

The conferees agree to provide \$5,000,000 for miniaturized wireless systems and agree that these funds be used only to initiate a university-industry program to utilize advances in three-dimensional chip scale packaging and high temperature superconducting transceiver performance, to reduce the size, weight, power consumption and cost of advanced wireless communication systems for covert military and intelligence operations.

## CHALLENGE PROGRAM FOR INNOVATIVE TECHNOLOGY IN DEFENSE ACQUISITION

The conferees support the actions taken by the Department in response to section 818 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261) and the initial improvements made in facilitating the rapid transition into Defense acquisition programs of technologies developed in successful Small Business Innovative Research (SBIR) phase two projects. The conferees provide \$12,500,000 only for the further development and rapid insertion of innovative SBIR technologies as competitive alternatives to Defense acquisition program technologies. The Secretary of Defense shall select from third phase SBIR proposals, which will result in improvements in performance, affordability, manufacturability, or operational capability at the component, subsystem, or system level. The Secretary shall report to the Defense Committees the technologies selected and the improvements expected by June 1, 2001. In addition, the conferees direct the Office of the Secretary of Defense to work with the congressional defense committees to establish a more rigorous management and oversight structure of the burgeoning number of rapid acquisition programs within the Department. The conferees expect this management and oversight structure to be reflected in the fiscal year 2003 Defense budget request.

ommendations. While the Congress does not oppose such an effort, resources should be found from within existing funds.

TITLE V—REVOLVING AND  
MANAGEMENT FUNDS  
The conference agreement is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Defense Working Capital Funds .....	1,951,986	1,826,986	1,826,986	1,312,986

DEFENSE WORKING CAPITAL FUNDS  
The conferees agree to provide \$1,312,986,000 for the Defense Working Capital Fund.

NATIONAL DEFENSE SEALIFT FUND  
The Conferees agree to provide to \$432,408,000 for the National Defense Sealift Fund, a decrease of \$74,000,000 from the budget request amount. This includes a reduction of \$99,000,000 originally requested for MARAD and an increase of \$25,000,000 to finance the cost of constructing additional sealift capacity.

STRATEGIC SEALIFT CAPACITY  
The conference agreement reserves \$25,000,000 of amounts appropriated to the National Defense Sealift Fund to accelerate the introduction of next-generation high-

speed sealift ships to support the Navy's global military sealift requirements. The conferees expect the Navy to work with other federal agencies using interagency agreements, economy act procedures, or other mechanisms to provide loan guarantees to shipbuilders to meet this objective. These funds may not be used for research and development, or for defense-features on commercial sealift ships.

MOBILE DEPLOYABLE ASSETS  
In the wake of the tragic events of September 11, 2001, the conferees are concerned that future deployments of United States forces may expose personnel to the risk of terrorist attack similar to the bombing of Khobar Towers in Saudi Arabia and the Ma-

rine barracks in Beirut. Instead of building vulnerable fixed barracks for United States forces deployed in highly dangerous locations, the conferees believe the Navy should give the highest consideration to acquiring mobile, deployable assets, which could provide additional "in situ" hospital, housing, MWR, or command and control capability. The conferees recommend that the Navy expeditiously pursue the possibility of capitalizing MARAD loan guarantees for up to two multipurpose passenger ships presently under construction in a United States shipyard.

REPROGRAMMING

The conferees share the concerns expressed in the report accompanying the House version of the Department of Defense Appropriations bill for fiscal year 2002 regarding the diversion of funds from the DoD military medical facilities (MTFs) to pay for contractor-provided medical care. To limit such transfers within the Defense Health Program operation and maintenance account, the conferees agree that the Department of Defense shall follow prior approval reprogramming procedures for transfers with a cumulative value in excess of \$25,000,000, into the Private Sector Care activity group.

In addition, the conferees agree that the Department of Defense shall provide budget execution data for all of the operation and maintenance budget activities as well as the procurement and research, development, test and evaluation accounts of the Defense Health Program. Such budget execution data shall be provided quarterly to the congressional defense committees through the DD-COMP(M) 1002.

PEER REVIEWED MEDICAL RESEARCH PROGRAM

The Senate recommended \$50,000,000 for a Peer Reviewed Medical Research program.

The conferees agree to provide \$50,000,000 for this program, and recommend that the Department of Defense consider the following projects as candidates for study: Complex rAD-Vector vaccine for MGBV; chemo-preventative approaches to smoking related illness; childhood asthma; chiropractic care; closed loop frozen blood processing systems; Counter Narcotics Tactical Operations Medical Support Program (CONTOMS); Dengue Fever vaccine; high risk infectious disease; medications for fungal and bacterial infections such as Fungi Free; metabolically engineered tissue for trauma care; military nutrition research; Padgett's disease; pre-clinical & clinical activities of the Novonex/Ex-Rad drugs; radiation protection; real-time heart rate variability; self test methods of screening for cervical cancer; smoking cessation; social work research; Traumatic Brain injury; Volume Angio Cat (VAC) research, and VRE research.

TRICARE: NEXT GENERATION CONTRACTS

The conferees are aware that the Department of Defense is presently considering the issuance of new requirements for future TRICARE managed care contracts. A major revision under consideration is the prospect

of "unbundling" healthcare and administrative services and using different contractors with different geographic coverage responsibilities. While the conferees support DoD efforts to improve and streamline the provision of healthcare services, the conferees note that the Department's deliberations have caused great concern among health care providers and, if not managed carefully and thoughtfully, could reignite the instability and confusion that has existed in the past years as this program was being implemented. Accordingly, the conferees direct that before any proposals for significant structural changes to the TRICARE managed care contract are made public, that the Assistant Secretary of Defense (Health Affairs) solicit the views of the congressional defense committees. The conferees also direct the Department to allow sufficient time for full congressional review before any final decisions are made in this respect.

PROGRAM MANAGER FOR CHEMICAL  
DEMILITARIZATION

The conferees support the guidance provided in the Senate report under this heading with two changes. The conferees agree that for the quarterly report the Department may use an existing report provided it includes the data requested and is available within 14 days of the end of each quarter. In addition, there is no requirement for a restructuring report. All other direction, in-

cluding the January 15th report and the language regarding incentive programs remains as written.

## ANNISTON CHEMICAL DESTRUCTION FACILITY

The conferees share the Senate's concern regarding emergency preparedness measures at the Anniston Chemical Destruction Facility. In lieu of the language in the Senate report, the conferees support the current agreement established by the Department, FEMA, and state and local officials, con-

cerning the commencement of destruction operations and critical safety matters, as stated in the letter from the Under Secretary of Defense (AT&L) dated November 1, 2001.

TITLE VIII—GENERAL PROVISIONS

The conference agreement incorporated general provisions of the House and Senate versions of the bill which were not amended. Those general provisions that were amended in conference follow:

The conferees included a general provision (Section 8005) which amends language which provides the Department of Defense with transfer authority.

The conferees included a general provision (Section 8008) which amends language providing multiyear procurement authority.

The conferees included a general provision (Section 8027) which amends Senate language earmarking funds in "Aircraft Procurement, Air Force" for maintaining 18 B-52 attrition reserve aircraft.

The conferees included a general provision (Section 8031) which amends language which earmarks funds for Civil Air Patrol operation and maintenance, and counterdrug programs.

The conferees included a general provision (Section 8032) which amends language limiting the number of staff years that may be funded for Federally Funded Research and Development Centers and reduces funding for that purpose.

The conferees included a general provision (Section 8045) which amends language which extends the availability of funds for convert actions and agent operations.

The conferees included a general provision (Section 8054) which amends language recommending rescissions. The rescissions agreed to are:

The conferees take particular note of the devastating effects that the tragic events of September 11, 2001, have had upon the software/information technology industry in and around New York City and other affected areas. The conferees encourage the SBA to work with these companies, as appropriate, in the administration of programs funded in this Act.

DISASTER LOANS PROGRAM ACCOUNT

The conference agreement includes \$75,000,000 for disaster loan subsidies as proposed in the Senate bill, with a technical modification, instead of \$140,000,000 as proposed in the House bill.

GENERAL PROVISIONS—THIS CHAPTER

The conference agreement includes the following general provisions:

Sec. 201.—The conference agreement includes Section 201, waiving certain authorization requirements, as proposed in the House bill.

Sec. 202.—The conference agreement includes Section 202, regarding Small Business Administration disaster loans in response to the September 11, 2001, terrorist attacks, proposed as Section 201 in the Senate bill.

Sec. 203.—The conference agreement includes Section 203, regarding Small Business Administration disaster and business loans in response to the September 11, 2001, terrorist attacks, proposed as Section 202 in the Senate bill.

Sec. 204.—The conference agreement includes Section 204, regarding a report on the United States-People's Republic of China Science and Technology Agreement of 1979, proposed as Section 203 in the Senate bill.

The language included in Section 626(c) of Public Law 107-77 quashed the Department of State's motion to vacate the judgment obtained by plaintiffs in Case Number 1:00CV03110(EGS) and reaffirmed the validity of this claim and its retroactive application. Nevertheless, the Department of State continued to argue that the judgment obtained in Case Number 1:00CV03110(EGS) should be vacated after Public Law 107-77 was enacted. The provision included in Section 626(c) of Public Law 107-77 acknowledges that, notwithstanding any other authority, the American citizens who were taken hostage by the Islamic Republic of Iran in 1979 have a claim against Iran under the Antiterrorism Act of 1996 and the provision specifically allows the judgment to stand for purposes of award damages consistent with Section 2002 of the Victims of Terrorism Act of 2000 (Public Law 106-386, 114 Stat. 1541).

CLASSIFIED PROGRAMS

The conferees' recommendations regarding classified programs are addressed in a classified annex accompanying this report.

PENTAGON RECONSTRUCTION

Section 305 of the conference agreement appropriates \$475,000,000 to continue reconstruction of the Pentagon Reservation to repair damage inflicted as a result of the attack on September 11, 2001. The conferees commend the hard work and dedication of the workers and managers responsible for this reconstruction effort, and endorse efforts to complete this endeavor in record time.

The conference agreement also includes a provision (section 305(b)), transferring an additional \$300,000,000 from unobligated and uncommitted funds appropriated to the President in Public Law 107-38 to finance the simultaneous construction and hardening of military command centers at the Pentagon. Prior to September 11 the Pentagon renovation plan included above ground and unhardened military command centers. The conferees concur that it is now only prudent for security purposes that these critical command centers be relocated below ground and hardened against catastrophic attack at the earliest opportunity. This change in plan must be made now before overall Pentagon reconstruction design, construction, and budgetary decisions are set in place. It is expected that this change will accelerate completion of the entire renovation project from 2014 to 2010, at an estimated additional cost of \$800,000,000. The conferees believe this acceleration is important for the national security and for the safety of the 25,000 men and women who work in the Pentagon complex.

FORMER SOVIET UNION THREAT REDUCTION

The conference agreement includes language transferring \$30,000,000 of unobligated balances from the "Former Soviet Union Threat Reduction" appropriation to the Department of State, in support of the Biological Weapons Redirect and Science and Technology Centers programs. The conferees endorse the use of these funds as proposed in the House report, including the redirection of former Soviet biological production facilities to vaccine production, and efforts to engage former Soviet biological weapons scientists in collaborative research with U.S. corporations to develop new vaccine and drug therapies for highly infectious diseases.

QUICK REACTION ACTIVITIES

The conferees recommend \$15,000,000 only for quick reaction capabilities to develop and deploy promising new weapons and other counter-terrorism and counter-WMD capabilities that are recommended by the Department of Defense Combating Terrorism Technology Task Force.

BLAST MODELING—VISUALIZATION AND MITIGATION

The conferees recommend \$5,000,000 only for the conversion of current CIA/OTI technology for use by the USAF Force Protection Battlelab, to accelerate efforts to quickly produce accurate blast models for specific or unique structures and to assist in choosing specific deployment and billeting locations. An additional \$5,000,000 is provided only for Blast Mitigation Research, involving field testing of explosives tests against structures.

# U.S. ARMY MEDICAL RESEARCH INSTITUTE FOR INFECTIOUS DISEASES

Due to the terrorist acts of September 11, 2001 and the anthrax incidents that followed, the DoD is developing an expanded role for the United States Army Medical Research Institute for Infectious Diseases (USAMRIID), the lead DoD laboratory for medical aspects of biological warfare defense. The conferees provide \$1,000,000 to the Army, only for the purpose of conducting a feasibility study to finalize the mission of USAMRIID and determine the infrastructure requirements and associated costs needed to accommodate USAMRIID's expanded role. The conferees direct the Secretary of Army to submit a report on the results of this study and plans for including a facility expansion in the Future Years Defense Plan (FYDP) to the congressional defense committees no later than March 15, 2002.

## FUTURE REQUESTS FOR SUPPLEMENTAL APPROPRIATIONS

The conferees agree with direction in the House report which directs that future supplemental appropriations requests for defense and intelligence activities in response to the attacks of September 11, 2001, as well as any other supplemental requests for the Department of Defense and the Intelligence Community, be submitted using the traditional appropriations account format and detailed supporting and justification materials.

## DEFENSE EMERGENCY RESPONSE FUND REPORT

In light of the adjustments recommended by the conferees to the supplemental request, and other guidance regarding the use of previously allocated defense and intelligence funds from Public Law 107-38, the conferees direct that not later than 45 days following enactment of this Act the Secretary of Defense and the Director of Central Intelligence, in consultation with OMB, provide the House and Senate Committees on Appropriations with a revised, comprehensive and detailed report, using the guidelines in the House report, regarding the overall allocation of all appropriations for defense and intelligence activities (including obligations up to that point, and forecasted expenditures) made available from Public Law 107-38. Similar reports shall be submitted quarterly during fiscal year 2002 following submission of the first report.

## GENERAL PROVISIONS—THIS CHAPTER

The conference agreement includes a general provision (Section 301) which retains a provision proposed in the supplemental request, and amended in the House bill, which establishes the terms and conditions under which funds appropriated under the heading "Defense Emergency Response Fund" may be used, provides transfer authority for these funds, and includes a number of reporting requirements.

The conference agreement includes a general provision (Section 302) which amends a similar provision proposed in the supplemental request, and in the House and Senate bills, which allows funds in the appropriations account "Support for International Sporting Competitions, Defense" to be used to reimburse members of the National Guard while performing State active duty or full-time National Guard duty, and temporarily waives the requirement to obtain certification from the Attorney General for the Department's assistance to the 2002 Winter Olympic Games in order to meet safety and security needs.

The conference agreement includes a general provision (Section 303) which provides that funds appropriated by this Act, or made available by the transfer of funds in this Act, for intelligence activities are deemed to be

specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414).

The conference agreement includes a general provision (Section 304) identified by Administration officials, which provides that not to exceed \$100,000,000 of funds in the Defense Emergency Response Fund may be made available for payments to Pakistan and Jordan for support in connection with Operation Enduring Freedom. The conferees direct that funds subject to this provision do not include funds in this Act, and are limited only to those funds previously made available in Public Law 107-38 and formally allocated to the Department of Defense consistent with that Act's notifications by the President to the Congress.

The conference agreement includes a general provision (Section 305) regarding the reconstruction of the Pentagon, as discussed earlier in this statement.

The conference agreement includes a general provision (Section 306) providing additional transfer authority to the Operation and Maintenance accounts of the Department of Defense, if required to meet costs incurred in support of Operations Enduring Freedom and Noble Anvil.

#### FAMILY COURT ACT OF 2001 (H.R. 2657)

The conferees agree that the Joint Committee on Judicial Administration of the District of Columbia Courts may use operating funds as necessary to implement the District of Columbia Family Court Act of 2001 (H.R. 2657). The conferees on the District of Columbia Appropriations Act, 2002 (H.R. 2944) intended that the District of Columbia Courts would use funds provided under the heading "Federal Payment for Family Court Act" for any expenses related to implementing family court reform. The conferees did not intend or expect the District of Columbia Courts to be penalized for expenditures or reimbursements of operating expenses when legitimate family court reform expenses were incurred.

The conferees request the Joint committee to maintain a separate accounting of those expenses that are attributable to family court reform and those general operating expenses that are unrelated to family court reform.

#### DISTRICT OF COLUMBIA FUNDS

##### DIVISION OF EXPENSES

Language is included under "District of Columbia Funds" to allow the District government to obligate and spend the Federal payments appropriated earlier in this chapter to the District government's general fund.

The conference agreement also inserts a proviso that requires all funds in this chapter to be made available no later than September 30, 2002.

The conference agreement includes language in a new section 404 that makes a technical correction to the District of Columbia Appropriations Act, 2002 (H.R. 2944).

Such general reduction is to be applied on a pro rata basis to all programs, projects, and activities under the "Renewable Energy Resources" account and in accordance with guidance previously provided in the Energy and Water Development Appropriations Act, 2002.

##### ATOMIC ENERGY DEFENSE ACTIVITIES

##### NATIONAL NUCLEAR SECURITY

##### WEAPONS ACTIVITIES

The conference agreement provides \$131,000,000 for Weapons activities as proposed by the Senate instead of \$88,000,000 as proposed by the House. Of these funds, \$76,000,000 is to address safeguards and security configuration vulnerabilities throughout the nuclear weapons complex; \$30,000,000 is to accelerate deployment of near-term cyber security measures at all nuclear weapons complex sites; and \$25,000,000 is to provide additional resources for secure transportation asset safeguards system operations including \$1,000,000 for program direction activities.

The conferees strongly urge the National Nuclear Security Administration to use a portion of the resources provided to develop its extensive capabilities in security and counter-terrorism technologies and make them available to other government agencies as appropriate.

##### DEFENSE NUCLEAR NONPROLIFERATION

The conference agreement includes \$226,000,000 for Defense Nuclear Nonproliferation as proposed by the Senate instead of \$18,000,000 as proposed by the House. Funding of \$78,000,000 is provided for nonproliferation and verification research and development, including \$18,000,000 for development activities to automate more of the processes and increase the number of agents that can be detected with the Biological Aerosol Sentry and Information System (BASIS), a prototype biological detection system to provide civilian public health systems with early warning of airborne biological agents. From within available funds for research and development, research is to be conducted with respect to radiological dispersion devices known as "dirty bombs".

Funding of \$120,000,000 is provided for the International Materials Protection, Control and Accounting program to secure nuclear materials at sites in Russia and the Newly Independent States.

An additional \$15,000,000 has been provided to the Russian Transition Initiatives program for the Nuclear Cities Initiative and the Initiatives for Proliferation Prevention program.

Additional funding of \$10,000,000 is provided for the International Nuclear Safety Program to improve the safety of Soviet-designed nuclear reactors, and an additional \$3,000,000 is provided for the program direction account.

Within available fiscal year 2002 funds, the Department is directed, in conjunction with other Federal agencies and departments, to accelerate the development and deployment of the PROTECT program, a chemical agent defensive system to cover multiple stations

and tunnels in a high-threat section of the Washington Metropolitan Area Transit Authority subway system and to expand the program to include one Boston transit station.

##### ENVIRONMENTAL AND OTHER DEFENSE ACTIVITIES

##### DEFENSE ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT

The conference agreement provides \$8,200,000 for Defense Environmental Restoration and Waste Management as proposed by the House and the Senate. Of this funding, \$3,300,000 is for the Hanford site in Washington and \$4,900,000 is for the Savannah River Site in South Carolina to provide additional safeguards and security measures.

##### OTHER DEFENSE ACTIVITIES

The conference agreement provides \$3,500,000 for Other Defense Activities as proposed by the House and the Senate. Of these funds, \$2,500,000 is to expand the protective forces, replace outdated alarm and radio systems, and install public address systems at the Department of Energy's Washington, D.C., facilities. Funding of \$1,000,000 will be used to purchase and accelerate deployment of distributed air sampling units for the detection of biological agents using the prototype Biological Aerosol Sentry and Information System.

##### INDEPENDENT AGENCY

##### NUCLEAR REGULATORY COMMISSION

##### SALARIES AND EXPENSES

The conference agreement includes \$36,000,000 for salaries and expenses at the Nuclear Regulatory Commission as proposed by the Senate. These additional resources are to be used: re-analyze the vulnerabilities and physical protection requirements for NRC-licensed facilities and for radioactive materials in transit; re-analyze the design basis threats which are used to design safeguards systems to protect against acts of radiological sabotage and to prevent the theft of nuclear materials; strengthen the processes used to authorize access to NRC-licensed facilities; upgrade NRC's emergency preparedness and incident response programs; and strengthen NRC's infrastructure and communications capabilities. The conferees direct the Commission to utilize the resources of the National Infrastructure Simulation and Analysis Center in these efforts. The conferees intend that these funds shall be excluded from license fee revenues.

##### GENERAL PROVISIONS—THIS CHAPTER

Sec. 501. The conference agreement includes a provision proposed by the Senate which provides that up to \$500,000 may be available to the Secretary of Energy for safety improvements to roads along the shipping route to the Waste Isolation Pilot Plant site. These funds are to be made available from funds provided to the Carlsbad Office.

DEPARTMENT OF HEALTH AND HUMAN  
SERVICES

CENTERS FOR DISEASE CONTROL AND  
PREVENTION

DISEASE CONTROL, RESEARCH, AND TRAINING

The conference agreement provides \$12,000,000 as proposed by both the House and the Senate for baseline safety screening for emergency services personnel and rescue and recovery personnel.

OFFICE OF THE SECRETARY

PUBLIC HEALTH AND SOCIAL SERVICES  
EMERGENCY FUND

The conference agreement provides \$140,000,000 for Grants for Immediate Re-

sponse as proposed by the Senate. The House bill contained no similar provision. These funds shall be distributed as grants to help pay for healthcare-related costs incurred by organizations as a result of the September 11, 2001 terrorist attacks. These funds are to be allocated based upon the most current data available, with priority and without caps, to applicants that, by virtue of their proximity to an attack zone, the number of patients served, or the provision of specialized services such as trauma care, participated most directly in disaster response efforts. These funds are not available for costs that have otherwise been reimbursed or are eligible for reimbursement from other sources.

The conference agreement also provides \$2,504,314,000 for emergency expenses to respond to the September 11, 2001 terrorist attacks and for other expenses necessary to support activities related to countering potential biological, disease, and chemical threats to civilian populations. This is \$1,013,714,000 above the request.

The agreement includes \$865,000,000 for upgrading State and local capacity instead of \$423,000,000 as proposed by the House and \$1,000,000,000 as proposed by the Senate. The conferees concur with language in the House report recommending that a portion of this funding be provided under the authority of sections 319B, 319C, and 319F of the Public Health Service Act, as amended.

The conferees believe that a portion of this funding should be available immediately to meet the needs of State and local health departments as a result of the September 11, 2001 attacks and other subsequent events related to terrorism. The conferees also believe that a portion of this funding should be granted under the authority of the Public Health Threats and Emergencies Act, which calls for assessments of public health needs, provides grants to State and local public health agencies to address core public health capacity needs, and provides assistance to State and local health agencies to enable them to respond effectively to bioterrorist attacks. The Secretary is requested to provide the House and Senate Committees on Appropriations with a plan to distribute this funding within 15 days of enactment of this Act. The conferees concur with language contained in the House report directing the Secretary to provide a report on the State of the Nation's public health and medical preparedness for bioterrorism.

The conferees further believe that the peer review of competitive grants required under 319C, while desirable under normal circumstances, should be waived, at the discretion of the Secretary, to expedite funding to address gaps in public health preparedness.

In administering assistance for enhancing laboratory capacity, the conferees request CDC to ensure that funds are made available, to the greatest extent possible, to all laboratories participating in the Laboratory Response Network and in need of capacity upgrades, as well as to labs in need of upgrades in order to be brought into the network.

The agreement includes \$135,000,000 for grants to hospitals and other entities to assist hospitals and emergency departments in preparing for, and responding to, incidents requiring mass immunization and treatment. This funding would allow State and regional planning with local hospitals, including community health centers. It would also allow some communities to move beyond the planning phase and begin implementation of their plans. The conferees urge the Secretary to ensure that plans and activities supported with these funds are integrated and coordinated with State and local plans.

The agreement includes \$100,000,000 for upgrading capacity at CDC. The agreement provides that up to \$10,000,000 of these funds

shall be for the tracking and control of biological pathogens. Funds are also included to update and enhance existing laboratory protocols for use by State and local health laboratories, to increase CDC's capacity to handle additional laboratory samples from States, to enhance epidemic intelligence service/disaster response teams, to develop rapid toxic screening and other activities. The agreement also includes \$7,500,000 for environmental hazard control activities conducted by CDC.

The conferees understand that CDC is presently utilizing microbial characterization technology that provides an automated genetic fingerprint of any bacterium, has the capacity to process a large volume of samples in a short time frame, and can electronically communicate identified bacterial ribotypes from multiple laboratory locations for centralized identification. This diagnostic technology could assist in redressing laboratory processing backlogs and improving disease surveillance, including rapid detection of a multiple-location bioagent release. The conferee surge CDC to accelerate evaluation of this technology.

The agreement includes \$85,000,000 for bioterrorism-related research, including next-generation vaccine research at the National Institute of Allergy and Infectious Diseases (NIAID). The conferees encourage NIAID to conduct research on safer alternatives to the existing smallpox vaccine, such as a vaccine using an inactivated smallpox virus.

The agreement also provides \$70,000,000 for the construction of a level-4 biosafety laboratory and related infrastructure costs at NIAID. In addition, \$71,000,000 is included for improving laboratory security at CDC and the National Institutes of Health. This is in addition to the \$250,000,000 provided in the CDC's appropriation for buildings and facilities in the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriations Act for fiscal year 2002. The conferees understand that the Department has under review recommendations to expand the number of facilities in the country to work with infectious agents and pathogens that pose significant risk to the population. The conferees concur that additional facilities are needed. The conferees are aware of a proposal to improve and modernize existing facilities and to complete construction of a new level-3 biosafety laboratory at Colorado State University in Fort Collins, Colorado. The conferees strongly urge the Secretary to support this proposal.

The agreement includes \$593,000,000 for the National Pharmaceutical Stockpile and \$512,000,000 for the purchase of the smallpox vaccine. The conferees note that if we suffer a major biological terror attack, such as introduction of smallpox into multiple regions of the country, we will need to vaccinate large numbers of Americans very quickly. The conferees are aware that technology exists and has been employed by the military to more rapidly inoculate large groups. The conferees urge CDC to consider employing this technology so that it is available in large cities and other areas where the need is greatest.

The agreement includes \$55,814,000 for the Office of the Secretary. These funds are for improving disaster medical assistance teams, national disaster medical system readiness, and other activities related to the coordination of the Department's activities concerning bioterrorism preparedness and response.

The agreement includes \$10,000,000 for the Substance Abuse and Mental Health Services Administration for grants pursuant to section 582 of the Public Health Service Act to develop programs focusing on the behavioral

and biological aspects of psychological trauma response and for developing knowledge with regard to evidence-based practices for treating psychiatric disorders of children and youth resulting from witnessing or experiencing a traumatic event.

The agreement includes language to allow the Secretary to transfer these amounts between categories subject to normal reprogramming procedures as proposed by the Senate. The House bill contained no similar provision.

#### DEPARTMENT OF EDUCATION SCHOOL IMPROVEMENT PROGRAMS

The conference agreement provides \$10,000,000 as proposed by both the House and the Senate for the Project School Emergency Response to Violence program.

#### RELATED AGENCIES NATIONAL LABOR RELATIONS BOARD SALARIES AND EXPENSES

The conference agreement provides \$180,000 as proposed by both the House and the Senate for the National Labor Relations Board, Salaries and Expenses.

#### SOCIAL SECURITY ADMINISTRATION LIMITATION ON ADMINISTRATIVE EXPENSES

The conference agreement provides \$7,500,000 as proposed by both the House and the Senate for the Social Security Administration, Limitation on Administrative Expenses.

#### CHAPTER 9 LEGISLATIVE BRANCH JOINT ITEMS (INCLUDING TRANSFER OF FUNDS)

The conferees approve \$256,081,000 for the Legislative Branch to ensure the continuance of government; to enhance the safety and security of legislative branch offices, systems and employees; and to meet the needs arising from the recent anthrax-related events. Of this amount, \$34,500,000 is to be transferred to the Senate, \$41,712,000 to the House, \$350,000 to the Capitol Guide Service and Special Services Office, \$31,000,000 to the Capitol Police Board, \$106,304,000 to the Architect of the Capitol, \$29,615,000 to the Library of Congress, \$4,000,000 to the Government Printing Office, \$7,600,000 to the General Accounting Office, and \$1,000,000 as a grant to the United States Capitol Historical Society. The conferees direct that none of the funds provided to the Legislative Branch agencies (excluding the House of Representatives and the Senate) are to be obligated without prior approval of an obligation plan submitted to the Committees on Appropriations of the House and Senate.

The conferees direct the General Accounting Office to review and report on the actual and planned obligation of funds transferred to the entities of the Legislative Branch (excluding the House of Representatives and the Senate) pursuant to the Emergency Response Fund established by Public law 107-38 and to submit quarterly status reports on all expenditures to the Committees on Appropriations of the House of Representatives and the Senate.

Significant costs have been incurred by the Legislative Branch to respond to the anthrax-related events at the Capitol Complex; approximately \$23,000,000 has been included in this chapter for the United States Capitol Police, the Architect of the Capitol, the House of Representatives, the Senate, the Library of Congress, and the General Accounting Office. The conferees note that funds to reimburse the Environmental Protection Agency and the Department of Defense are included in other chapters of Division B. The conferees recognize that these costs are continually being assembled and will ensure

adequate funding is provided to properly respond to this unfortunate incident.

The conferees recognize that several activities of the United States Capitol Historical Society have been crippled due to loss of tourism to the Capitol since September 11, 2001. The conferees are concerned over the financial situation facing the Society and have included a \$1,000,000 grant in order for the organization to maintain its operations during the coming year. The conferees direct that the United States Capitol Historical Society submit a detailed spending plan and a plan for future self sufficiency to the Committees on Appropriations of the House of Representatives and the Senate prior to February 15, 2002.

The view of the critical need to increase the U.S. Capitol Police Force the conferees authorize an additional 195 FTEs, for a total of 1454 officers for fiscal year 2002. In addition, 74 civilian FTEs are authorized, for a total of 296 civilian FTEs for fiscal year 2002. These additional civilian positions are to establish an Office of Emergency Management and a Chem-Bio Strike Team.

#### ADMINISTRATIVE PROVISIONS—THIS CHAPTER

The conferees have included administrative positions that: authorizes the Senate Sergeant at Arms to acquire buildings and facilities to respond to an emergency situation and enter into a memorandum of understanding with an Executive Agency during emergencies; authorizes the House Chief Administrative Officer to acquire buildings and facilities to respond to an emergency situation and enter into a memorandum of understanding with an Executive Agency during emergencies; relates to the operations of the House of Representatives; authorizes any anthrax-contaminated mail delivered by the U.S. Postal Service to the House of Representatives to be destroyed or otherwise disposed of; to increase the salaries of the Chief and Assistant Chief of the Capitol Police; provides for recruitment and retention incentives for the United States Capitol Police; authorizes the Capitol Police to accept contributions of incidental items and services in response to emergencies; provides assistance to the Capitol Police by Executive Branch Departments and Agencies; authorizes the Chief of Police, to deputize members of the D.C. National Guard and duly sworn law enforcement personnel; authorizes the U.S. Capitol Preservation Commission to transfer funds from the Capitol Preservation Fund to the Architect of the Capitol for the Capitol Visitors Center; authorizes salary adjustments for four positions within the Architect of the Capitol; and various technical adjustments related to Public Law 107-68.

#### CHAPTER 10 DEPARTMENT OF DEFENSE MILITARY CONSTRUCTION MILITARY CONSTRUCTION, ARMY

The conference agreement provides \$20,700,000 for Military Construction, Army, instead of \$55,700,000 as proposed by the House. This funding will provide \$4,600,000 for a classified overseas project as requested by the President. The additional funding will provide \$7,000,000 for a classified project in Utah, and \$9,100,000 for three anti-terrorism/force projection projects at Fort Detrick in Maryland. The Senate did not include a similar provision.

*California: Fort Ord.*—The conferees are aware that the Army will convey two parcels of land the former Fort Ord, California, to the Fort Ord Reuse Authority (FORA) in the future. The City of Seaside, which is a member of FORA, will receive these parcels and could use the land to provide recreational opportunities to disadvantaged youth. Unfortunately, a feasibility study that will determine the environmental remediation needed

on the site is not scheduled for completion until 2005. The conferees would support FORA requesting an early transfer of this property, which would hasten the clean up of the property and therefore the conveyance of the property for these purposes.

**United States Army South Headquarters.**—The conferees understand that the Army has completed a study regarding a potential move of the United States Army South Headquarters from Fort Buchanan, Puerto Rico to Army bases in the continental United States. The conferees direct that any proposed relocation must be consistent with the mission and geographic orientation of the U.S. Army South and in accordance with and Army decision brief reviewing the various site alternatives and recommending the preferred site. The conferees further direct that the Army provide the House and Senate Appropriations Committees the results of that study and any further updates.

The conferees further direct the Army to report to the committee no later than February 28, 2002, the following concerning this relocation: the number of military and civilian personnel to be moved; the estimated cost; selection criteria and analysis of alternatives; and, any changes to the current plan.

#### MILITARY CONSTRUCTION, NAVY

The conference agreement provides \$2,000,000 for a perimeter road at Thurmont Naval Support Facility in Maryland as proposed by the House. The Senate did not include a similar provision.

#### MILITARY CONSTRUCTION, AIR FORCE

The conference agreement provides \$46,700,000 for Military Construction, Air Force, instead of \$47,700,000 as proposed by the House. This amount will provide \$20,000,000 for planning and design of a classified project. The additional \$26,700,000 is for construction of two classified overseas projects. The Senate did not include a similar provision.

#### MILITARY CONSTRUCTION, DEFENSE-WIDE (INCLUDING TRANSFER OF FUNDS)

The conference agreement provides \$35,000,000 for Military Construction, Defense-wide, to provide additional security enhancements at four sites where stockpiles of weapons of mass destruction are located. The House proposed funding this project in the "Military Construction, Army" account. The Senate did not include a similar provision.

#### GENERAL PROVISIONS—THIS CHAPTER

The conference agreement includes three general provisions.

Section 1001 provides the Department of Defense (DOD) with authority to use funds from the Defense Emergency Response Fund (DERF) for military construction projects. The Department is required to provide Congress with information describing the project and its costs 15 days before obligating the amounts.

Despite Congressional intent that the \$40,000,000,000 provided in P.L. 107-38 be used for purposes necessitated by the events of September 11, 2001, the Office of Management and Budget (OMB) and DOD unintentionally created a legal barrier for the funds to be used for military construction projects by depositing funds into the DERF account. As a result, projects vital to the war effort and to homeland security have been stalled while the Department worked through the complexities of section 2808 of title 10. Exercising the authority provided in this general provision overcomes these obstacles.

However, the conferees remain concerned that the recent process has not been the most effective method for providing funds for military construction projects when re-

sponding to an emergency. Consequently, the conferees direct the Department and OMB to analyze military construction requirements in future defense emergencies so they are properly included as part of any overall DOD/OMB submission to Congress rather than separate form any other defense emergency requirements.

Under the existing authority of section 2808 of title 10, a process exists for transferring prior year appropriations to supplement the DERF account for military construction required due to the terrorist acts of September 11, 2001. The conferees direct DOD to use unobligated balances from fiscal years prior to fiscal year 2002 for these purposes. Then, if insufficient unobligated funds are available, fiscal year 2002 appropriations may be transferred. Additionally, DOD is directed to notify Congress 15 days prior to any such transfer, to submit an accompanying Form 1391, and to consult, as is the current practice, about the source of funds from which the transfer is derived.

To date, DOD has used section 2808 authority on several occasions, transferring \$68,900,000 from authorized and appropriated military construction projects to unauthorized projects needed to effectively fight the war on terrorism and to provide security in the United States. The conferees agree that these projects are extremely important to adequately respond to the terrorist acts of September 11, 2001, and note that prior to invoking section 2808, the President must declare war or a state of emergency. However, the conferees direct DOD to reimburse accounts that were used as a source of funds for any project executed under section 2808 authority.

Yet, using unobligated balances from previously appropriated projects effectively increases the \$40,000,000,000 in supplemental appropriations provided for this purpose without a new appropriation. This action is being taken despite the fact that OMB continues to publicly assert that the \$40,000,000,000 provided under the Supplemental is more than sufficient to effectively prosecute the war effort. Clearly, using section 2808 authority belies this contention.

Section 1002 amends section 138 of Public Law 106-246 by inserting a new amount for completion of the Cadet Physical Development Center at the Military Academy, West Point, New York. The Army intends to pay for additional costs with savings from prior appropriations. The conferees remain concerned about cost overruns associated with this project and direct the Army to complete the project as expeditiously as possible within the current authorization.

Section 1003 amends section 2202(a) of the National Defense Authorization Act for Fiscal Year 2002 by making a technical correction.

#### CHAPTER 11

##### DEPARTMENT OF TRANSPORTATION

##### OFFICE OF THE SECRETARY

##### TRANSPORTATION SECURITY ADMINISTRATION

The conference agreement includes \$94,800,000 for the new Transportation Security Administration instead of \$15,000,000 as proposed by the House. The Senate provided no similar appropriation. Within this total, \$1,500,000 shall be for intelligence and security activities and \$93,300,000 shall be for port security grants.

**Port security.**—There are 361 public ports in the United States and they conduct over 95 percent of United States overseas trade. The Interagency Commission on Crime and Security in U.S. seaports reported in the fall of 2000 that the state of security in U.S. seaports generally ranges from poor to fair and that control of access to the seaport or sen-

sitive areas within the seaport is often lacking. The Commission found that criminal organizations are exploiting weak security in ports to commit a wide range of cargo crimes and that the vulnerability of American ports to potential terrorist attacks is high. The Commission recommended minimum security guidelines for U.S. seaports and implementation of a five-year crime and security technology plan.

The conference agreement includes \$93,300,000 for grants to U.S. seaports for security assessments and enhancements. The funds provided in the conference agreement can be used for security assessments and for implementation of measures once assessments have been performed. The conferees do not intend this grant funding to be used to displace current security funding and activities either provided by the ports or by federal agencies. The funding provided in the conference agreement is to be used for additional security activities not now being performed at the ports. In developing and administering this grant program, the Under Secretary of Transportation for Security is expected to work in cooperation with local port authorities and other affected federal agencies, including the Coast Guard and Maritime Administration.

#### PAYMENTS TO AIR CARRIERS

##### (AIRPORT AND AIRWAY TRUST FUND)

The conference agreement includes \$50,000,000 for the payments to air carriers (essential air service program) instead of \$57,000,000 as proposed by the Senate. The House provided no similar appropriation. These additional funds will bring the total program level to \$113,000,000 in fiscal year 2002. This amount should be sufficient to maintain commercial air service to all eligible communities. For new points with significant enplanement levels that may become eligible under the essential air service program in fiscal year 2002 that currently have three flights per day, the conferees direct that this level of service continue.

#### COAST GUARD

##### OPERATING EXPENSES

The conference agreement includes \$209,150,000 instead of \$144,913,000 as proposed by the House and \$285,350,000 as proposed by the Senate. Funds are available until September 30, 2003 as proposed by the Senate instead of available until expended as proposed by the House. The conference agreement distributes funds as follows:

Item	Amount
Reserve activation .....	\$110,000,000
Restoration of fiscal year 2002 reductions .....	33,507,000
Anti-terrorism activities, including Marine safety and security teams .....	41,293,000
Chemical/biological strike teams .....	2,500,000
National Defense Authorization Act entitlements .....	21,850,000
<b>Total .....</b>	<b>209,150,000</b>

**Marine safety and security teams.**—The conferees agree that funding for marine safety and security teams is for establishment of 348 full-time permanent positions for four new teams, including two teams with area-wide operating responsibility (one each for the Atlantic and Pacific operating areas) and two teams to exclusively serve those port areas presenting the greatest port security challenges, especially those ports with a substantial concentration of critical Department of Defense facilities and a shortage of alternative floating assets. The Senate bill included funds for two area-wide teams and four teams for specific ports. The conferees

have no objection to the Commandant co-locating the area-wide teams with the port specific teams if he believes that economies of scale and programmatic benefits will result.

#### FEDERAL AVIATION ADMINISTRATION OPERATIONS

##### (AIRPORT AND AIRWAY TRUST FUND)

The conference agreement includes \$200,000,000 instead of \$291,500,000 as proposed by the House and \$251,000,000 as proposed by the Senate. Funds are available until September 30, 2003 as proposed by the Senate instead of available until expended as proposed by the House. Funds are derived from the airport and airway trust fund as proposed by the Senate instead of from the general fund as proposed by the House. The conference agreement distributes funds as follows:

Item	Amount
Cockpit door modifications	\$100,000,000
Sky marshals .....	65,000,000
Security experts .....	20,000,000
Training facilities .....	15,000,000
Total .....	200,000,000

**Cockpit door modifications.**—The conference agreement provides \$100,000,000 for new or modified cockpit doors on commercial aircraft to improve security of the flight deck. The conferees understand that, under current plans, this is the maximum amount likely to be obligated during fiscal year 2002.

**Sky marshals.**—The conferees agree to provide \$65,000,000 in this bill for additional sky marshals, and direct that, of the funds provided to the Transportation Security Administration in the Department of Transportation and Related Agencies Appropriations Act, 2002 from security user fees, \$55,000,000 shall be reserved and used in fiscal year 2002 for the hire of additional sky marshals. The House bill included \$233,000,000 in this bill for the sky marshal program; the Senate bill provided no funds.

#### FACILITIES AND EQUIPMENT (AIRPORT AND AIRWAY TRUST FUND)

The conference agreement includes \$108,500,000 instead of \$175,000,000 as proposed by the House and no funds as proposed by the Senate. Funds are to be derived from the airport and airway trust fund as proposed by the House, and available until September 30, 2004 instead of available until expended as proposed by the House. As requested by the administration, these funds are to be used for the procurement and installation of explosive detection systems.

#### RESEARCH, ENGINEERING, AND DEVELOPMENT (AIRPORT AND AIRWAY TRUST FUND)

The conference agreement includes \$50,000,000, to be derived from the airport and airway trust fund, as proposed by the Senate. Funds are to remain available until September 30, 2003 instead of September 30, 2002, as proposed by the Senate. The House bill contained no similar appropriation. Of the funds provided, not less than \$25,000,000 is for proof of concept demonstrations as described in the Senate report accompanying the bill, incorporating a global satellite-based communications, navigation and surveillance architecture; a highly integrated, secure common information network; and a broadband two-way secure communications capability. The conferees direct that these demonstrations shall leverage significant industry cost-sharing efforts. The remaining funds are for short-duration demonstrations and pilot projects for airports and airlines involving potential new security technologies and concepts, including \$2,000,000 for a demonstration of 100 percent positive passenger bag match technology at Reagan Washington National Airport in Virginia, as proposed by the House.

#### GRANTS-IN-AID FOR AIRPORTS (AIRPORT AND AIRWAY TRUST FUND)

The conference agreement includes \$175,000,000 instead of \$200,000,000 as proposed by the Senate, to be derived from the airport and airway trust fund and to remain available until expended, for reimbursement to airports of direct costs associated with additional or revised security requirements since the September 11th terrorist attacks. The House bill contained no similar appropriation. The conferees note that the funding provided is available for security improvements and other assistance at Ronald Reagan Washington National Airport in Virginia and the Johnstown Airport Authority in Pennsylvania in response to the terrorist attacks of September 11, 2001.

#### FEDERAL HIGHWAY ADMINISTRATION MISCELLANEOUS APPROPRIATIONS

##### (HIGHWAY TRUST FUND)

The conference agreement provides \$100,000,000 for miscellaneous highway-related appropriations instead of \$110,000,000 as proposed by the Senate. Funds shall be derived from the highway trust fund, and shall be for the critical expansion of interstate ferry service necessitated by the attacks of September 11th. Prior to those attacks, 67,000 daily commuters utilized the PATH transit service between New Jersey and the World Trade Center. The conference agreement directs that these funds be made available to expand critical ferry services to serve PATH commuters traveling from New Jersey to Manhattan. A total of \$10,000,000 for traffic controls and detours in New York City and for the repair and reconstruction of non-Federal-aid highways destroyed or damaged by the collapse of the World Trade Center buildings is provided under the Federal Emergency Management Agency as proposed by the House, instead of under this head as proposed by the Senate.

#### FEDERAL-AID HIGHWAYS EMERGENCY RELIEF PROGRAM (HIGHWAY TRUST FUND)

The conference agreement provides \$75,000,000, to be derived from the highway trust fund and to remain available until expended, for emergency relief as proposed by both the House and Senate.

#### FEDERAL RAILROAD ADMINISTRATION SAFETY AND OPERATIONS

The conference agreement provides \$6,000,000 for safety and operations of the Federal Railroad Administration, as proposed by both the House and the Senate. Funding shall be used for additional expenses related to overtime and the hiring of police and security officers; increased inspections of rail infrastructure; additional security personnel; additional inspector travel; and other security measures.

#### CAPITAL GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

The conference agreement provides \$100,000,000 for capital improvements of the National Railroad Passenger Corporation (Amtrak) as proposed by the Senate. The House provided no similar appropriation. These funds shall be used solely to enhance the safety and security of the aged Amtrak-owned rail tunnels under the East and Hudson Rivers. Funding shall remain available until expended.

#### FEDERAL TRANSIT ADMINISTRATION FORMULA GRANTS

The conference agreement includes \$23,500,000 for formula grants as proposed by both the House and the Senate. These supplemental funds will finance the replacement of buses and transit kiosks destroyed by the

collapse of the World Trade Center; provide technical assistance for transit agencies to refine and develop security and emergency response plans; accelerate and expand the PROTECT program aimed at detecting chemical and biological agents in transit stations; conduct emergency response drills with transit agencies and local first response agencies; and provide security training for transit operators. Funding shall remain available until expended.

**Dulles corridor transit project.**—To facilitate the extension of rail service to Washington Dulles International Airport, the Administrator of the Federal Transit Administration shall work with the Commonwealth of Virginia, Northern Virginia municipalities, the Metropolitan Washington Airports Authority, and the Washington Metropolitan Area Transit Authority to develop and implement a financing plan for the Dulles Corridor rapid transit project.

#### CAPITAL INVESTMENT GRANTS

The conference agreement provides \$100,000,000 for capital investment grants as proposed by the Senate. The House bill contained no similar appropriation. These funds shall be used to accelerate transit improvements already underway by the Port Authority of New York and New Jersey and New Jersey Transit, to improve access to the PATH and New Jersey Transit systems, and to initiate transit improvements that are necessary to better accommodate new commuting patterns in the region as a result of the terrorist attack on September 11th. None of these funds should be made available to the Washington Metropolitan Area Transit Authority (WMATA), as their security needs are addressed elsewhere in the bill.

#### RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

##### RESEARCH AND SPECIAL PROGRAMS

The conference agreement appropriates a total of \$2,500,000 for research and special programs as proposed by the House instead of \$6,000,000 as proposed by the Senate. Funding is provided specifically to address security-related problems the agency encountered during the September 11th crisis. This includes \$1,000,000 for equipment and contractor support related to information dissemination in the crisis management center; \$800,000 to purchase and install dedicated communication cables for the continuity of operations site; and \$700,000 for equipment and contractor support to allow the crisis management center to send and receive classified information.

#### OFFICE OF INSPECTOR GENERAL SALARIES AND EXPENSES

The conference agreement includes \$1,300,000 for salaries and expenses of the Office of Inspector General instead of \$2,000,000 as proposed by the Senate. The House bill contained no similar appropriation. Following the attacks of September 11th, the OIG has been given several new responsibilities associated with the Transportation Security Act as well as border security initiatives, which may be addressed with these funds. The Secretary of Transportation and the Director of the Office of Management and Budget should carefully monitor the needs of this office an all the new requirements placed upon it to assure the adequacy of funding for this office. Funding shall be available until September 30, 2003.

#### RELATED AGENCY

#### NATIONAL TRANSPORTATION SAFETY BOARD SALARIES AND EXPENSES

The conference agreement includes \$650,000 instead of \$465,000 as proposed by the House and \$836,000 as proposed by the Senate. Funding is available until September 30, 2003.

## GENERAL PROVISIONS—THIS CHAPTER

The conference agreement includes the Senate provision that amends section 5117(b)(3) of the Transportation Equity Act for the 21st Century relating to the contract for follow-on deployment of an intelligent transportation system project. The House proposed no similar provision. The conferees note that, while this provision allows the Secretary to allocated these funds through a sole source procurement, the provision does not mandate such an action. The decision to distribute this funding on a non-competitive basis is left entirely to the Secretary.

The conference agreement includes the Senate provision that prohibits the use of appropriated funds, or revenues generated by the National Railroad Passenger Corporation (Amtrak), to implement section 204(c)(2) of Public Law 105-134, relating to development of an action plan, until enactment of an Amtrak reauthorization act. The House proposed no similar provision.

The conference agreement modifies the Senate provision making technical corrections to the Department of Transportation and Related Agencies Appropriations Act, 2002. The provision specifies that of the funds authorized under section 110 of title 23, United States Code, and provided for in the Department of Transportation and Related Agencies Appropriations Act, 2002, that no funds shall be available for the program authorized under section 1101(a)(11) of Public Law 105-178; \$29,542,304 shall be set aside for the Woodrow Wilson bridge project; \$5,896,000 of the \$23,896,000 provided for the national motor carrier safety program is for state commercial driver's license program improvements; and up to \$2,300,000 of the \$56,300,000 available for border infrastructure improvements may be transferred by the Secretary of Transportation to the General Services Administration for construction of transportation infrastructure for law enforcement purposes in the border states. The conference agreement includes a provision that allows funds for environmental streamlining to be used for non-administrative costs, including grants, cooperative agreements, and other transactions. The House proposed no similar provisions. The conferees are very concerned at the lack of progress the Department had made in issuing the rural consultation provision of the statewide planning regulations. After three years and a clear Congressional mandate under the Transportation Equity Act for the 21st Century, rural local elected officials continue to be left out of statewide planning discussions. The conferees fully expect this rule to be promulgated no later than February 1, 2002.

The conference agreement includes the Senate provision making technical corrections to the Department of Transportation and Related Agencies Appropriations Act, 2002. This provision specifies that funds appropriated to the Research and Special Programs Administration, including funds derived from the pipeline safety fund, in the Department of Transportation and Related Agencies Appropriations Act, 2002 shall remain available until September 30, 2004. The House bill proposed no similar provision.

The conference agreement includes the Senate provision that makes a technical correction to the department of Transportation and Related Agencies Appropriations Act, 2002. This provision amends item 1497 of the table contained in section 1602 of Public Law 105-178 pertaining to capital improvements to intermodal marine freight and passenger facilities in Anchorage, Alaska. The House proposed no similar provision.

The conference agreement makes technical corrections to the Department of Transportation and Related Agencies Appropriations

Act, 2002. This provision increases the surface transportation projects appropriation under section 330 by \$4,300,000, and reduces section 349 by an equivalent amount. Of the funds provided, \$300,000 is for the US-61 Woodville widening project in Mississippi and \$4,000,000 is for the City of Renton/Port Quendall interstate maintenance project in Washington. The Senate proposed making these technical corrections by funding these projects within the Federal Highway Administration's obligation limitation. The House proposed no similar provision.

The conference agreement amends bill language contained in the Department of Transportation and Related Agencies Appropriations Act, 2002 for the salaries and expenses of political and Presidential appointees and prohibits funding for certain positions.

The conference agreement includes a provision that relates to the participation of the state of Texas in the state infrastructure bank pilot program.

The conference agreement deletes the provision in title II of division E of the Senate bill which would have required certain procedures regarding labor integration issues relating to the combination of commercial air carriers.

## CHAPTER 12

## SALARIES AND EXPENSES

The conferees agree to provide no funding as proposed by the House instead of \$600,000 as proposed by the Senate.

## BUREAU OF ALCOHOL, TOBACCO AND FIREARMS

## SALARIES AND EXPENSES

The conferees agree to provide \$31,431,000 as proposed by both the House and the Senate.

## UNITED STATES CUSTOMS SERVICE

## SALARIES AND EXPENSES

The conferees agree to provide \$392,603,000 instead of \$301,759,000 as proposed by the House and \$292,603,000 as proposed by the Senate. This fully funds the President's request, and includes additional funding as follows: \$245,503,000 for staffing and inspection and investigate technology for borders and critical seaports of entry, to include not less than \$10,000,000 for the Southwest Border; \$18,300,000 for a commercial backup data facility; and \$21,300,000 to support overseas initiatives to counter money laundering such as that used to finance terrorist or criminal activity.

This funding addresses shortages in critical law enforcement staffing and technology

investments. To ensure the optimum impact on current vulnerabilities, the conferees direct that the \$245,503,000 for border and seaport security shall not be available until 15 days after the Customs Service submits to the Committees on Appropriations and the Secretary of the Treasury a financial plan based upon a comprehensive assessment of the most effective uses of the Service's resources, including the funds provided in this Act, for protection along the Northern Border, Southwest Border, and at critical seaports. The Secretary is directed to review the plan and, within 15 days of its receipt, notify the Committees of his findings.

The conferees direct that this detailed plan address the use of Customs Service resources for the Northern Border, Southwest Border, critical seaports, and other ports of entry that present a potential security risk. The financial plan shall include a revised breakout of fiscal year 2002 funding by object class, and by programmatic category, to reflect the application of funding provided through this Act, and should be consistent with the materials submitted with the President's fiscal year 2003 budget request. Any changes in funding levels that exceed the thresholds for reprogramming set forth in the fiscal year 2002 Appropriations Act for the Department of the Treasury will require advance approval by the Committees, as set forth in the reprogramming guidelines.

## OPERATION, MAINTENANCE AND PROCUREMENT, AIR AND MARINE INTERDICTION PROGRAMS

The conferees agree to provide \$6,700,000 as proposed by both the House and the Senate.

## INTERNAL REVENUE SERVICE

## PROCESSING, ASSISTANCE, AND MANAGEMENT

The conferees agree to provide \$12,990,000 instead of no funding as proposed by the House and \$16,658,000 as proposed by the Senate. These funds are to address the highest priority security and response needs of the program.

## TAX LAW ENFORCEMENT

The conferees agree to provide \$4,544,000 as proposed by both the House and the Senate.

## INFORMATION SYSTEMS

The conferees agree to provide \$15,991,000 as proposed by the Senate instead of no funding as proposed by the House. The conferees acknowledge the need to adequately provide backup for the recovery of IRS computer systems and include a provision to ensure that the design and construction of the backup system to closely coordinated with the major IRS business systems modernization effort that is underway. The conferees expect the backup system to be completely compatible with all new computer systems.

## UNITED STATES SECRET SERVICE

## SALARIES AND EXPENSES

The conferees agree to provide \$104,769,000 as proposed by both the House and the Senate.

## POSTAL SERVICE

## PAYMENT TO THE POSTAL SERVICE FUND

The conferees agree to provide \$500,000,000 for emergency expenses of the Postal Service instead of \$600,000,000 as proposed by the Senate and no funding as proposed by the House. The conferees agree that these funds shall be obligated for the purpose of protecting postal employees and postal customers from exposure to biohazards material, to sanitize and screen mail, and to replace or repair Postal Service facilities and destroyed or damaged in New York City as a result of the September 11, 2001, terrorist attacks. The conferees note that the Postal Service has not received a direct appropriation for operations for nearly two decades. Nonetheless, the conferees acknowledge the extraordinary

circumstances surrounding biohazardous material in the mail and have provided this emergency supplemental appropriation to address these specific security concerns. In providing these emergency funds, the conferees do not intend to set a precedent for operational subsidies of the Postal Service. The conferees continue to support current law requirements that the Postal Service operate on a self-sustaining basis.

The conferees are aware that the recent incidents of anthrax in the mail pose both technology-based and process-based challenges for the Postal Service, the conferees commend the Postal Service for its on-going efforts and are pleased with the progress made to date. The conferees further believe that additional actions taken by the Postal Service should be based on a comprehensive emergency preparedness plan and, of the funds provided, have withheld from obligation funds for sanitizing and screening the mail until the Postal Service submits such a plan to the Committees on Appropriations, the House Committee on Government Reform and the Senate Committee on Governmental Affairs.

As part of its emergency preparedness plan, the conferees expect the Postal Service to include an assessment of threats to the health and safety of employees and customers of the Postal Service and the integrity of the mail; testing and evaluating the options for detecting and/or addressing those threats, including both technology-based and process-based options; a comparison of the costs and benefits of options under consideration; an evaluation of the strengths and weaknesses of the technologies under consideration for mail sanitization, including an analysis of risks to human health and safety and to mail products associated with each of those technologies; and a timetable for implementing the options selected.

EXECUTIVE OFFICE OF THE PRESIDENT  
OFFICE OF ADMINISTRATION  
SALARIES AND EXPENSES

The conferees agree to provide \$50,040,000 for emergency expenses of the Office of Administration, as proposed by the Senate instead of no funding as proposed by the House. The conferees are concerned by the lack of detail and background submitted by the Office of Administration in support of emergency appropriations for the Executive Office of President and, more specifically, by limitations in cost estimates for various projects. Although the conferees are aware that many of the cost estimates were prepared in rapid response to the events of September 11, 2001, the conferees are concerned that estimates for some projects may have changed by as much as 250 percent. For instance, while original estimates for building modifications and communication installation activities for the Office of Homeland Security were \$2,000,000, the conferees understand that the cost of this project may now be closer to \$7,000,000. The conferees have fully funded the President's request for emergency expenses of the Office of Administration, for the specific projects, and in the specific amounts requested, as follows:

In the event that there are deviations from these line items, the conferees direct the Office of Administration to follow the appropriate reprogramming and transfer guidelines, as included in the joint explanatory statement accompanying the fiscal year 2002 conference report for the Treasury and General Government Appropriations Act, 2002. In particular, the conferees note the requirement that a reprogramming request must be submitted for any action where funds earmarked for a specific activity are proposed to be used for a different activity. Finally, the conferees expect the Office of Administration to fully coordinate the implementation of these, and any future, security changes with the General Services Administration, the Secret Service, the White House Military Office, and other Executive Office of the President offices and agencies.

INDEPENDENT AGENCIES

GENERAL SERVICES ADMINISTRATION

REAL PROPERTY ACTIVITIES

FEDERAL BUILDINGS FUND

The conferees agree to provide \$126,512,000, instead of \$126,500,000 as proposed by the Senate and \$87,360,000 as proposed by the House. Within this amount, full funding is provided for the requested replacement space costs and security costs in New York and Wash-

ington, D.C. The conferees understand that sufficient funding has been provided elsewhere for relocation costs in Washington, D.C., and do not include any funding for that purpose in this account. The conferees strongly encourage the General Services Administration to allocate that portion of the funds provided to meet nationwide security needs in a way that addresses the greatest threats, risks, and vulnerabilities on a national basis regardless of regional boundaries.

NATIONAL ARCHIVES AND RECORDS  
ADMINISTRATION

OPERATING EXPENSES

The conferees agree to provide \$1,600,000 instead of no funding as proposed by the House and \$4,818,000 as proposed by the Senate. Within this amount the conferees have provided full funding for the requested increases in security operating expenses at Archives I and Archives II and direct that the balance of the funds be used to address the greatest security concerns of the Presidential libraries.

REPAIRS AND RESTORATION

The conferees agree to provide \$1,000,000 instead of no funding as proposed by the House and \$2,180,000 as proposed by the Senate. Within this amount the conferees have provided full funding for the requested increases in security repairs and restoration expenses at Archives I and Archives II and direct that the balance of the funds be used to address the greatest security concerns of the Presidential libraries.

GENERAL PROVISION, THIS CHAPTER

The conferees agree not to include Section 1101 as proposed by the Senate regarding telecommunications access.

Sec. 1201. The conferees agree to include a technical amendment to the "9/11 Heroes Stamp Act of 2001", as proposed by the Senate in Division D.

CHAPTER 13

DEPARTMENT OF VETERANS AFFAIRS

DEPARTMENTAL ADMINISTRATION

GENERAL OPERATING EXPENSES

The conferees recommend \$2,000,000 in general operating expenses as proposed by the House for a comprehensive security evaluation of the VA which should include and consider security actions and recommendations implemented by other Federal, State and local government agencies. The Senate included funds for similar purposes under construction, major projects.

None of these funds may be used to create an new Office of Operations and Preparedness as the Department has not provided specific information on the creation of such office.

CONSTRUCTION, MAJOR PROJECTS

The conferees have not provided funds in this account for security evaluations as proposed by the Senate but instead included funding under general operating expenses as proposed by the House.

DEPARTMENT OF HOUSING AND URBAN  
DEVELOPMENT

COMMUNITY PLANNING AND DEVELOPMENT  
COMMUNITY DEVELOPMENT FUND

The conference agreement includes \$2,000,000 from funds appropriated in Public Law 107-38 for economic recovery assistance for affected areas in New York City as proposed by the Senate, instead of \$1,875,000,000 as proposed by the House.

The conference agreement includes language designating \$10,000,000 for a program to aid the travel and tourism industry in New York City as proposed by the House.

Modified language is included, similar to language proposed by the Senate, requiring

the Lower Manhattan Redevelopment Corporation to develop criteria and process applications for the distribution of funds made available under Community Development Fund from funds provided in Public Law 107-38. Modified language is also included, similar to language proposed by the Senate, requiring the corporation to process expeditiously applications for assistance. The conferees expect the corporation to make every effort to respond to applications from individuals, nonprofit and small businesses for economic losses within 45 days of submission of an application.

Modified language is also included, similar to language proposed by the Senate, designating not less than \$500,000,000 of the \$2,700,000,000 made available for the Community Development Fund from amounts provided in Public Law 107-38 for assistance to individuals, nonprofits and small businesses located on or south of 14th Street, with a limitation of \$500,000 per small businesses.

The conferees adopt the language included in the Senate report related to semi-annual audits by the Inspector General of the Department of Housing and Urban Development. In lieu of the requirement in the Senate report related to reports related to disposition of claims, the conferees instead direct the Department of Housing and Urban Development to provide quarterly reports to the Committees on Appropriations on the obligation and expenditure of these funds.

The conferees recognize the unique benefits the New York board of trade (NYBOT) brings to the economy of the City of New York, as well as to the country. In this regard, the conferees strongly encourage the Corporation to consider the needs of the NYBOT as it allocates assistance provided from the Community Development Fund.

#### MANAGEMENT AND ADMINISTRATION

##### OFFICE OF INSPECTOR GENERAL

The conference agreement includes \$1,000,000 from funds appropriated in Public Law 107-38 to replace office and investigative equipment damaged in the terrorist attacks, as proposed by both the House and Senate.

#### INDEPENDENT AGENCIES

##### DEPARTMENT OF HEALTH AND HUMAN SERVICES

##### NATIONAL INSTITUTES OF HEALTH

##### NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

Provides \$10,500,000 for the National Institute of Environmental Health Sciences (NIEHS) as proposed by the House and the Senate. Bill language has been adopted by the conferees which clarifies that funds may be used for all NIEHS research and worker training programs as authorized by law. Bill language has also been included amending Public Law 107-73 to clarify the intent of Congress with respect to funds provided for NIEHS for fiscal year 2002.

##### ENVIRONMENTAL PROTECTION AGENCY

##### SCIENCE TECHNOLOGY

Provides \$90,308,000 for science and technology instead of \$10,000,000 as proposed by the House and \$41,514,000 as proposed by the Senate. Funds are intended to be used to assess and improve building security at EPA laboratory sites as well as perform drinking water vulnerability assessments, and anthrax decontamination activities.

##### ENVIRONMENTAL PROGRAMS AND MANAGEMENT

Provides \$39,000,000 for environmental program and management instead of \$140,360,000 as proposed by the House and \$38,194,000 as proposed by the Senate. The conferees have provided funds necessary to assess and improve building security at EPA sites, pay for

the temporary relocation and other costs for EPA's Region 2 office, provide technical materials and contingency planning manuals for wastewater treatment plants, pay for anthrax decontamination activities, and assume additional personnel costs associated with EPA's increased responsibilities in criminal investigations and enforcement actions related to bioterrorism and other counterterrorism activities. The conferees recognize and acknowledge that the hiring of additional employees will increase the Agency-wide FTE level. The conferees also recognize that additional Agency-wide requirements to respond to the terrorist attacks of September 11, 2001 as well as subsequent counterterrorism activities will result in increased travel costs of the Agency. In this regard, the conferees agree that the travel ceiling assumed as part of the fiscal year 2002 appropriation is no longer valid, and requests the Agency to provide a quarterly letter detailing the variance in travel relative to the 2002 budget submission.

#### HAZARDOUS SUBSTANCE SUPERFUND

Provides \$41,292,000 for hazardous substance superfund as proposed by the Senate instead of \$5,800,000 as proposed by the House. The conferees agree that funds will provide for a new West Coast "Immediate Response Team", pay for the temporary relocation and other costs for EPA's Region 2 office, pay for anthrax decontamination activities, and provides for personnel, training, equipment, and planning related to increased responsibilities in responding to terrorism and counterterrorism activities. The conferees note that in addition to funds provided for future such activities by EPA, funds provided herein are also intended to reimburse expenses of the Agency incurred while assisting anthrax investigations and cleanup actions at the United States Capitol and Congressional office building complex, the Brentwood and other United States Post Office locations, and other such work performed prior to enactment of this Act.

#### STATE AND TRIBAL ASSISTANCE GRANTS

Provides \$5,000,000 for state and tribal assistance grants as proposed by the House and the Senate. Funds are provided for State grants for counterterrorism coordinators to work with EPA and drinking water utilities in assessing drinking water safety.

Bill language has been included making technical corrections for two targeted water and wastewater grants provided in previous appropriations Acts.

The conferees note that the cost-share requirement for a National Community Decentralized Demonstration project in Missouri, provided under this heading in Public Law 107-73 (item number 173), should be the same as that required for the previous six such demonstration projects approved in fiscal years 1999 and 2000.

#### FEDERAL EMERGENCY MANAGEMENT AGENCY DISASTER RELIEF

The conferees agree to provide \$4,356,871,000 for disaster relief to fund additional efforts in response to the September 11, 2001 terrorist attacks. The amount provided includes \$10,000,000 for expenses related to traffic control and detours in New York City and for the repair and reconstruction of non-Federal-aid-eligible highways destroyed or damaged by the collapse of the World Trade Center buildings.

The conferees are concerned that there may be some gaps in assistance to those affected by the terrorist attacks on September 11, 2001. The conferees have been informed by FEMA that all firefighters, law enforcement personnel, emergency medical personnel, and victims of this incident will be compensated through FEMA or other federal programs.

FEMA has indicated in writing that they are unaware of any gaps in assistance with respect to the terrorism attacks. FEMA is expected to provide funding for all eligible recipients in an expeditious manner.

#### SALARIES AND EXPENSES

Provides \$25,000,000 for salaries and expenses instead of \$30,000,000 as proposed by the House and \$20,000,000 as proposed by the Senate. The amount provided includes \$10,000,000 for the national security division. The conferees are concerned about the continuing lack of information regarding a new Office of National Preparedness within FEMA and agree, that while a portion of the funding provided by this appropriation may be used to establish the Office, FEMA must inform the Congress of the structure, responsibilities, and roles of this new Office, with particular emphasis on its relationships to the Office of Homeland Security and the Department of Justice. Therefore, the conferees direct FEMA to report to the Committees on Appropriations by February 15, 2002 on the structure of the Office of National Preparedness, including a staffing plan, and its duties and functions in relation to other agencies involved in Homeland security.

#### EMERGENCY MANAGEMENT PLANNING AND ASSISTANCE

Provides \$220,000,000 for emergency planning and assistance, instead of \$290,000,000 as proposed by the Senate and \$35,000,000 as proposed by the House. Of the amount provided, \$21,000,000 shall be used to carry out the fire grants program as authorized by the Federal Fire Prevention and Control Act of 1974, as amended by Public Law 106-398. The conferees have included bill language which provides that up to 5 percent of the funds may be transferred to salaries and expenses for administrative costs associated with this program. In addition \$10,000,000 is to be used for enhancement of FEMA's ability to support the 2002 Winter Olympics.

Within 90 days of enactment of this Act, the Director of the Federal Emergency Management Agency (FEMA) shall submit to the Director of the Office of Homeland Security and to the Congress a report which shall include:

(1) a complete accounting of all emergency and terrorism preparedness training courses offered by FEMA and all departments and agencies of the federal government;

(2) a discussion of the effectiveness of those courses, the possible consolidation of all federal emergency and terrorism preparedness training courses, the adequacy of federal training courses in the area of chemical and biological weapons, and training models used in the private sector that the Director considers as being representative of the best safety and security practices, particularly relating to the aftermath of a chemical or biological attack.

#### NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

##### HUMAN SPACE FLIGHT

The conferees have agreed to provide \$76,000,000 for human space flight instead of \$81,000,000 as proposed by the House and \$64,500,000 as proposed by the Senate. The amount provided includes \$8,000,000 for information security, \$60,000,000 for security and counterintelligence, and \$5,000,000 for communications capabilities. An additional \$3,000,000 is provided for enhanced radar capability (TPS-75 mobile radar system) to provide low-altitude coverage for security needs at the Kennedy Space Center.

#### SCIENCE, AERONAUTICS AND TECHNOLOGY

The conferees agree to provide \$32,500,000 for science, aeronautics and technology, instead of \$36,500,000 as proposed by the House

and \$28,600,000 as proposed by the Senate. The amount provided includes \$12,000,000 for information security, \$15,000,000 for security and counterintelligence and \$5,500,000 for communications capability.

#### OFFICE OF SECURITY

In August 2001, NASA established the Office of Security Management and Safeguards under the direction of an Associate Administrator reporting directly to the NASA Administrator. The Associate Administrator for Security Management and Safeguards is the senior security and counterintelligence advisor to the NASA Administrator, with ultimate authority for NASA-wide security and counterintelligence operations, processes, functions, and activities, as well as administrative authority over NASA security funds. The conferees support the establishment of the Office of Security Management and Safeguards, and the full authority of this Office over Agency-wide security and counterintelligence activities and funding. Furthermore, the conferees agree with direction included in the Senate Report that NASA shall identify funding from within available Agency resources to provide for approximately 35 additional FTE to staff the Office of Security Management and Safeguards at NASA Headquarters and at NASA's field Centers. The conferees also agree that responsibilities of the NASA Office of Security Management and Safeguards shall in no way prevent the Office of Inspector General from conducting its lawful investigative activities, including investigations into cyber crime. Further, the conferees expect that the Office of Security Management and Safeguards and the Office of the Inspector General will continue to share counterintelligence and intelligence threat information concerning NASA information technology networks as it pertains to cyber-based threats to NASA.

#### OFFICE OF INSPECTOR GENERAL

The conferees have not included any additional funding for the Office of Inspector General. The House had proposed an increase of \$3,000,000 and the Senate had proposed no additional funding.

#### NATIONAL SCIENCE FOUNDATION RESEARCH AND RELATED ACTIVITIES

Provides \$300,000 for research and related activities as proposed by the House and the Senate. Funds are provided for additional security measures at NSF research facilities.

#### GENERAL PROVISIONS, THIS CHAPTER

Retains language proposed by the Senate authorizing the Points of Light Foundation to name community service projects after individual victims of the September 11, 2001 attacks and create a website and database to catalogue such projects. No federal funds are to be used for these activities. The House did not include a similar provision.

Retains language proposed by the Senate authorizing the Cook Inlet Housing Authority to use the previously appropriated funds for a tribal student housing project. The House did not include a similar provision.

The conference agreement includes modified language, similar to language proposed by the Senate, making available up to \$11,300,000 for obligations under section 514 of the Multifamily Assisted Housing Reform and Affordability Act (MAHRAA). Of this amount, up to \$1,300,000 in fiscal year 2002 funds is authorized to be used to reimburse vouchers submitted by section 514 grantees through October 15, 2001 for prior year commitments which were probable violations of the Anti-Deficiency Act (ADA). The conferees note that the Department of Housing and Urban Development has yet to provide sufficient information to the Committees on

Appropriations related to violations of the ADA related to section 514 grants. The conferees expect the Department to investigate fully this matter and provide the necessary notifications to the President and the Congress in accordance with the requirements set forth in the Anti-Deficiency Act and Office of Management and Budget Circular A-34. Pending conclusion of the investigation and notification requirements, the Department is authorized to use a portion of the \$10,000,000 provided in fiscal year 2002 for new grant awards to reimburse grantees for activities completed pursuant to prior year grant agreements. Should the Department use funds for this purpose, the amount made available for new grant awards shall be reduced accordingly. The conferees direct the Secretary of the Department of Housing and Urban Development to provide bimonthly reports to the Committees on Appropriations on the status of technical assistance funds spent under section 514 of MAHRAA, including the status of the investigation of probable ADA violations, a spending plan for the \$11,300,000 made available under this section, and the status and findings of audits conducted by the Inspector General, with the first report due no later than January 15, 2002.

Modified language is also included earmarking \$1,500,000 from funds provided to the Office of General Counsel and the Office of Multifamily Housing Assistance Restructuring to be used for section 514 technical assistance grants, similar to language proposed by the Senate.

New language is included clarifying that the authorization to use funds to rectify a violation of the Anti-Deficiency Act in no way releases an officer or employees from the requirements set forth pursuant to the Act.

Inserts language making several technical corrections to economic development initiatives under the heading "Community Development Fund" in Public Law 107-73.

#### CHAPTER 14

##### GENERAL PROVISIONS

The conference agreement includes section 1401, as proposed by the Senate, which states that amounts obligated pursuant to this division are subject to the terms and conditions provided in Public Law 107-38. The House had no similar provision.

The conference agreement includes section 1402, as proposed by the House and the Senate, concerning availability of funds appropriated within this division.

The conference agreement includes section 1403 concerning transfer authority for national guard expenses for services related to homeland security. Each request for transfer shall include a declaration that, as of the date of the request, none of the funds proposed for transfer have been obligated, and none will be obligated, until the Committees on Appropriations have approved the request.

#### DIVISION C—SPENDING LIMITS AND BUDGETARY ALLOCATIONS FOR FISCAL YEAR 2002

The conference agreement includes, as division C, budgetary provisions that are necessary to conform existing budget law with final appropriations agreements. Sections 101 adjusts the fiscal year 2002 discretionary caps in the Balanced Budget and Emergency Deficit Control Act of 1985 to levels consistent with final appropriations action. This section also provides for conforming adjustments to the fiscal year 2002 budget resolution, and includes a small budget authority allowance for technical scoring differences that may exist between the Office of Management and Budget and the Congressional

Budget Office. Section 102 resets the Pay-As-You-Go scorecard to zero.

#### DIVISION D—MISCELLANEOUS PROVISIONS

The conference agreement modifies a provision, proposed by the Senate in Division E, related to certain real property in South Dakota. The House bill contained no similar provision.

The conference agreement includes the text of a provision, proposed by the Senate in Division E, Title II, section 201, which expands the number of Trustees of the John F. Kennedy Center for the Performing Arts. The House had no similar provision.

#### PROVIDING FOR CONSIDERATION OF H.R. 3525, ECONOMIC SECURITY AND WORKER ASSISTANCE ACT OF 2001

Mr. REYNOLDS. Mr. Speaker, by the direction of the Committee on Rules, I call up House Resolution 320 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

##### H. RES. 320

*Resolved*, That upon the adoption of this resolution it shall be in order without intervention of any point of order to consider in the House the bill (H.R. 3529) to provide tax incentives for economic recovery and assistance to displaced workers. The bill shall be considered as read for amendment. The previous question shall be considered as ordered on the bill to final passage without intervening motion except: (1) two hours of debate on the bill equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means; and (2) one motion to recommit. The yeas and nays shall be considered as ordered on the question of passage. Clause 5(b) of rule XXI shall not apply to the bill or amendments thereto.

The SPEAKER pro tempore (Mr. LATOURETTE). The gentleman from New York (Mr. REYNOLDS) is recognized for 1 hour.

Mr. REYNOLDS. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Texas (Mr. FROST), the ranking member of the Committee on Rules, pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

(Mr. REYNOLDS asked and was given permission to revise and extend his remarks.)

Mr. REYNOLDS. Mr. Speaker, House Resolution 320 is a closed rule providing for consideration of H.R. 3529, the Economic Security and Worker Assistance Act of 2001, with 2 hours of debate in the House, equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means. The rule waives all points of order against consideration of the bill, and it provides for one motion to recommit, with or without instructions.

Mr. Speaker, while the images of September 11's terrorist attacks will last forever in the minds of the American people, the fact is that the full impact of that day goes beyond that which we could conceive in the piles of rubble and twisted metal. While economic indicators show this Nation's economic downturn began in September of 2000, a full year before the attacks of September 11, that vicious assault on our Nation and its people only exacerbated an already fragile situation.

Months before the latest crisis, this Congress showed the leadership, the bipartisanship, and sense of purpose needed to bring our economy back through tax reduction for working Americans. We knew then that tax cuts put more money in the pockets of working families, increased consumer savings and spending, and spurred our economy back to recovery.

We came together, too, immediately after September 11, in another strong showing of leadership, bipartisanship, and sense of purpose when we gave this President the tools he needed to fight terrorism and punish those responsible for the attacks on our country, and began our financial commitment to rebuild those areas devastated by terrorism.

Today, we need to come together yet again, this time for America's workers; and the leadership, bipartisanship and sense of purpose we have shown the people of this great country must be evident again.

Cutbacks, layoffs, plummeting consumer confidence. These are some of the key factors contributing to our current economic situation. Just as we fortified our Nation's military in response to the attacks on our shores, we have the opportunity to fortify this Nation's economy against the attack on it by keeping jobs, by creating jobs, and by giving needed help to displaced workers.

Mr. Speaker, as my colleagues might be aware, we have an hour on this rule and a 2-hour debate on the economic stimulus bill yet before us tonight.

Make no mistake. This economic stimulus is critical to the workers and working families of America.

President Bush warned us this past weekend that without an economic stimulus package, we stand to lose as many as 300,000 American jobs; and no one knows of the current job struggle like my constituents and fellow New Yorkers across my great State. In New

York City alone, some 79,000 workers lost their jobs in the month of October. The ripple effect, where an estimated 15 percent of all State revenues are generated in Lower Manhattan, is, indeed, being felt across our State and our Nation. In fact, between September and October, 62,000 workers across New York became unemployed.

According to the New York State Labor Department, the Buffalo-Niagara region where I hail from lost 2,900 jobs over the last year. This is the longest decline in the local job market in 8 years.

The fact is that jobs just do not create themselves, and we in this Congress have both the ability and the responsibility to help create those jobs. This bill recognizes that we cannot create employees if we do not work with employers to create jobs.

As Franklin Delano Roosevelt once said, "I believe, I have always believed, and I will always believe in private enterprise as the backbone of economic well-being in America."

□ 2315

Through new incentives to compete, grow, and expand, the bipartisan, bicameral Economic Security and Worker Protection Act of 2001 will help business rebuild and create jobs for the American people. Workers want and they deserve a paycheck, not an unemployment check.

Of course, this stimulus package recognizes that job creation is a long-term project, and that assisting those out of work requires immediate short-term solutions. For those who have lost their jobs, an additional 13 weeks of unemployment benefits will be provided, retroactive to March, 2001.

Part-time workers will be aided by \$9 billion in surplus Federal unemployment funds transferred to States in order to help with health care or employment services.

Equally important to our work force is the availability and affordability of adequate health care. With the refundable health care tax credit provided in this legislation, no worker eligible for unemployment insurance will be left without the means to obtain quality health care protection.

So when my colleagues on the other side of the aisle and in the other Chamber wanted only COBRA-eligible workers to get a tax credit, leaving 45 percent of laid-off workers in small- and medium-sized businesses and those who never had job-based health care, let us not forget, not for a minute, who some of those workers are.

What about those who owned or worked in the delis or dry cleaners, those who delivered goods and cleaned offices in lower Manhattan? Should they have been excluded from being able to have affordable health care, as many would under the plan advanced by the Democratic leadership in the other body?

The bipartisan compromise plan, on the other hand, provides a refundable
